

## 2020 INSIGHT Summer Research Program

HIPRC's INSIGHT Summer Research Program is a National Institutes of Health (NIH) funded program, offering an outstanding opportunity to work on a research project in the field of injury.

Undergraduate and graduate students are matched to projects and project tasks, partnered with health sciences faculty from across the University of Washington. Students meet and learn from peers and health professionals from across the country.

Bringing together a diverse group of young people interested in health care and research allows HIPRC to create a unique and rich resource for students who seek to learn more about what they can accomplish in the field of injury and injury prevention. Past research areas include elucidating the risk factors and causes of injuries, injury prevention strategies, acute and chronic care of injured patients, and outcomes from trauma.

### Program Details:

- Program dates: June 15 - August 7, 2020
- Applications due by January 15, 2020
- Rigorous independent research
- Clinical shadowing experiences at UWMC and HMC
- Professional development seminars
- Injury research seminars
- Tours of various sites at Harborview, including the King County Medical Examiner's Office
- Participation in a competitive research symposium
- Social and team building activities
- **Stipend of \$3,200**
- Additional travel awards available to those who qualify
- Students traditionally underrepresented in the STEM fields, as well as first generation students are encouraged to apply
