A weekly roundup of research news and opportunities for the social work community

Issue: 5/12/2020

Blue text indicates active link

[Meet the Researchers: Hyun-Jun Kim, Phd, MSW](#)

Hyun-Jun Kim, PhD, is a Senior Research Scientist at the School of Social Work, University of Washington and Project Director of Aging with Pride: National Health, Aging, and Sexuality/Gender Study (NHAS) and Aging with Pride: Innovations in Dementia, Empowerment and Action (IDEA).

My journey in the US began in 1999 when I left my home country, South Korea, to attend the graduate school of Arizona State University to earn my MSW. The first three years provided invaluable opportunities that helped me to understand the value of diversity, human agency, and equity which inspired me to pursue a career in social work research. I was drawn to the commitment of UW's School of Social Work in promoting social justice and empowerment of disadvantaged populations. I earned my PhD in 2009 and continued my journey as Research Scientist at UW. My wife, Seong-Yun, has been my friend and my support for over 20 years, and we are parents of two teens, Tayne and Dahryn. I enjoy cooking, coffee, music, reading, camping, playing tennis, and spending time with family and friends.

My research interests include: health disparities in historically disadvantaged older adult communities and the role of human agency, multiple identities (particularly sexual and gender identity and race/ethnicity), and social relationships. Currently I serve as Project Director/Co-Investigator on two federally funded studies: NHAS, the first longitudinal study of LGBTQ older adults across the US examining modifiable factors predicting health and quality of life, and IDEA, a clinical trial study testing an intervention for improving physical functioning and quality of life of LGBTQ older adults with dementia and their care partners. I am also a Multiple Principal Investigator on an intervention study for older adults living alone with dementia who do not have care support. Additionally, I am a Fellow of the Gerontological Society of America. My scholarship has had a significant impact on the field of social work and other disciplines including gerontology and public health publishing more than 30 publications in internationally-circulated journals and participating in more than 40 conference papers.

Hyun-Jun and family

Research News and...

We are pleased to announce the funding of the Young Adult Study. **Dr. Kevin Haggerty at SDRG** is a Multiple PI along with Dr. Mark Eddy (NYU). This 5-year grant (about \$2.5 million) will examine the impact of a 12.5-year-long, relationship-based, professional mentoring program, Friends of the Children (FOTC), within the context of an existing multisite randomized controlled trial (RCT; FOTC versus control).

The research trial (The Child Study) was funded by NIH through NICHD from 2007-2013. The study uses a rigorous RCT design that includes two assessments of all of the active participants in The Child Study (N = 259), a sample of low-income, ethnically diverse, at-risk, urban youth. SDRG will also collect data from caregivers and administrative staff from schools, and other records at the endpoint. Implementation data collected by FOTC will also be used in the analysis. Using intent-to-treat analyses, this study will examine program impacts in three primary outcomes—avoidance of involvement in juvenile justice, graduation from high school or obtaining a GED, and delaying parenthood into young adulthood, at the program endpoint and 2 years later. We will explore whether hypothesized mechanisms of increased social capital mediate the relationships between intervention and outcomes. Finally, we will examine the relationship between various levels of program involvement in FOTC and program impact. We are excited to work with Friends of the Children on this important study.

Congratulations to Dr. **Clara Berridge** and study team! Their new article in JAMDA won the Mather Institute Innovative Research on Aging Bronze Award. The study team has donated the award money to the Pike Market Senior Center so that they can continue to provide meals to its members. A description of the research study will be featured in a brief report written for a senior living audience, highlighting key findings and implications for operations.

Important Travel News for Researchers:

Per the 20 March 2020 communication from Provost Richards to the UW community, the UW has restricted all official international travel until further notice. Moreover, the process for requesting waivers from those restrictions was suspended effective that same date. Since the 20 March communication, it has become apparent that some essential and time-sensitive international research may be hindered or prevented by this restriction. In turn, there needs to be a way for researchers to apply for exceptional travel waivers under the current policy. Provost Richards has now approved a process for researchers to submit travel waiver applications as exceptions to the current policy.

Researchers seeking an exceptional travel waiver should do the following:

- Secure written sponsorship/endorsement from the relevant Dean attesting to the fact that the research-related travel is essential in that cannot be postponed or delayed, and must commence while the current UW travel restriction policy is still in effect.
- Send the request and Dean's endorsement to Vice Provost Mary Lidstrom in the UW Office of Research at lidstrom@uw.edu with the subject line "International Travel Waiver Request".
- Concurrently, researchers should complete a [travel waiver application](#)
- The UW Office of Research will review the request to confirm that the travel is essential and then forward the request to ITRASC
- ITRASC will review the request once the travel waiver application AND confirmation from Dean and the Office of Research have been received.
- ITRASC will make a recommendation to the Provost who makes the final decision to approve or deny the request.

Researchers seeking an exceptional travel waiver should also be aware of the following:

- Prior to, during, and upon their return from international travel, researchers should monitor the latest UW information regarding COVID-19 and comply with the latest UW guidance for returning international travelers. For further information they should send an email to travelemergency@uw.edu.

For more information on this please click [HERE](#)

Research Funding, Fellowships, Internships and Job Opportunities:

From NIH:

[NIH Weekly Table of Contents for 2019](#)

[List of all active NIH grant opportunities](#)

[COVID-19 Funding and Funding Opportunities](#)

Selected Grant Opportunities:

[Provost Bridge Funding Program](#)

Deadline: May 15, 2020

The Provost's Office provides bridge funding to support faculty to span the gap in critical research programs. Faculty with a track record of extramural funding who have lost all of their research support at the time of the Bridge application, or who will lose all of their research support within six months of the Bridge application deadline. Junior faculty with a record of productivity who have exhausted their startup funds, but who have not yet obtained their first research funding (including an RRF award) either as a PI or as a co-investigator. A faculty providing a key resource to multiple faculty that has lost extramural support. One faculty member should submit the proposal on behalf of the team.

Awards are a maximum of \$50K for one year (from the Provost), and a 1:1 matching commitment is required. Please note (in regard to the 1:1 required matching commitment outlined below) that the school doesn't always have the match the money. These programs are not intended to initiate new research projects. For those needs, researchers should apply to the Royalty Research Fund seed grant program.

Also, please remember: SSW must be able to match bridge funds, so if you are planning to apply for this, please contact Associate Dean Levy prior to submission!

[Russel Sage Foundation](#)

Deadline: May 21, 2020

Because of the effects of COVID-19 on all facets of American life, the Russell Sage Foundation is changing its immediate priorities for letters of inquiry for the May 21, 2020, deadline. For this deadline, RSF will only consider LOIs that satisfy at least one of the following criteria:

- (a) The research is so timely and time-sensitive that the project must start before April 1, 2021; or,
- (b) the research analyzes social, political, economic, or psychological disruptions resulting from the coronavirus crisis that affect social and living conditions in the United States.

[Research on Biopsychosocial Factors of Social Connectedness and Isolation on Health, Wellbeing, Illness, and Recovery](#)

Deadline: June 8, 2020, March 17, 2021

This funding opportunity announcement (FOA) invites research projects that seek to explain the underlying mechanisms, processes, and trajectories of social relationships and how these factors affect outcomes in human health, illness, recovery, and overall wellbeing. Types of projects submitted under this FOA include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical and/or behavioral outcomes in humans to understand fundamental aspects of phenomena related to social connectedness and isolatedness.

[NIMHD Supports Sleep Disparities Research](#)

Deadline: July 14, 2020

Sleep is an important determinant of overall health. However, 30% to 40% of adults and 65% to 80% of

adolescents in the United States report sleep deficiencies. Racial and ethnic minority populations and socioeconomically disadvantaged populations have the highest prevalence of sleep deficiency.

[Pre-Doctoral Fellowship in Social Work Neuroscience and Clinical Research on Behavioral Health Interventions](#)

Deadline: Applications open until fellowship is awarded

Eric Garland, PhD, Associate Dean for Research at the University of Utah College of Social Work and Director of the Center on Mindfulness and Integrative Health Intervention Development, is seeking clinically-trained social work PhD students for a fellowship in social work neuroscience and clinical research on behavioral health interventions. Pre-doctoral fellows will assist in Federally-funded research; faculty at the University of Utah College of Social Work are currently conducting research projects funded by NIH -National Institute of Drug Abuse, NIH-National Center for Complementary and Integrative Health, NIH-National Institute on Aging, National Institute on Justice, the National Science Foundation, the Department of Defense, and Patient Center Research Outcomes Institute (PCORI).

[Robert Wood Johnson Foundation Evidence for Action: Investigator-Initiated Research to Build a Culture of Health](#)

Deadline: Open

Evidence for Action (E4A), a national program of the Robert Wood Johnson Foundation (RWJF), funds research that expands the evidence needed to build a Culture of Health. A Culture of Health is broadly defined as one in which good health and well-being flourish across geographic, demographic, and social sectors; public and private decision-making is guided by the goal of fostering equitable communities; and everyone has the opportunity to make choices that lead to healthy lifestyles.

[Scholarships available for excellent training institute in July!](#)

Applications are now being accepted for the 2020 mHealth Training Institute (mHTI) to be held at the University of California, Los Angeles from July 26 – 31, 2020. The week-long, residential program blends “deep dives” into the latest mHealth technologies and methodologies with team-science projects to provide the selected scholars with the transdisciplinary knowledge, competencies and collaborative networks required to tackle “wicked” healthcare problems.

[For the most current COVID-19 updates, please visit the following link:](#)

[COVID-19 Daily Updates](#)

Remember, all personnel should stay home if they experience any symptoms including fever, cough, or difficulty breathing. It is also advisable to encourage limiting physical contact with others, such as hand-shaking (substitute elbow bumps or bows) and sharing of food. Finally, the most effective prevention measure is frequent, thorough hand-washing.

Conferences, Trainings and Workshops:

[The 20th Research and Evaluation Conference on Self-Sufficiency \(RECS\)](#)

May 27 - 29, 2020 - online

Organized by the Office of Planning, Research, and Evaluation (OPRE) in the Administration for Children and Families (ACF), U.S. Department of Health and Human Services, RECS is free and open to the public. ACF will release a Call for Proposals for the 2020 RECS in summer 2019. In the meantime, find more

information about the 2020 RECS and past conferences on the RECS website.

[University of Michigan Web-based Certificate in Mixed Methods Research](#)
Mondays and Wednesdays in June 2020 - Online

This 30-hour program is designed for researchers and practitioners who are interested in learning more about the integration of qualitative and quantitative research methods and data, commonly used data collection methods and procedures, popular data analysis techniques used in the applied professions, and effective approaches to research conducted in practice settings. Special emphasis will be placed on increasing each participant's ability to critique theoretical foundations of research, form qualitative and quantitative research questions, create study designs that answer mixed methods research questions, and integrate qualitative and quantitative datasets for analysis and interpretation.

[Summer Mentoring Workshop on African American Aging Research](#)
June 3-5, 2020 - Ann Arbor, MI

This workshop emphasizes training in numerous areas including: 1) publishing in peer review journals, 2) writing grant proposals to the NIH, 3) the tenure process, 4) ethical conduct of research, 5) successful mentoring and collaborative relationships, and, most importantly, 6) how to navigate the academy.

Drs. Robert Joseph Taylor, Khari Brown and Amanda Woodward are the program faculty. This workshop is for junior (non-tenured) faculty and advanced graduate students. The primary objectives are on research skill enhancement, career mentoring, and professional development.

Please note that we take a life-span/course approach to African American aging. As such, scholars who do research exclusively on African American aging, as well as those who do research on issues that have a life span/course emphasis (e.g., inter-generational relationships, health disparities, adult mental health, health care utilization, religious participation, and social support networks), will find this workshop useful.

Costs: Up to 15 stipends for \$1,000 will be awarded to defray travel and hotel expenses.

Eligibility: Assistant Professors, PhD candidates and advanced doctoral program graduate students; U.S. citizen or permanent resident

How to Apply: If you are interested in being considered for this workshop, please apply by providing electronic copies of the following materials:

- A letter concisely describing your research plans with details about your current level of preparation for a research career. Please describe how participation in this workshop would contribute to your research career (2-page limit).
- Current curriculum and vitae.
- The name, phone number and email of a person who can comment on your research potential.
- One copy of prior published or unpublished work that provides evidence of your potential for rigorous social science research (e.g. dissertation abstract, chapter, article, conference paper).

EMAIL TO: Email completed applications as a single PDF file to Ms. Minti Henderson minti@umich.edu and Professor Taylor rjtaylor@umich.edu by Monday April 06, 2020.

[Joint World Conference on Social Work Education and Social Development](#)
June 28th – July 1st, NOVEMBER 8TH TO 11TH, 2020 - Remini, Italy

Under the title PROMOTE HUMAN RELATIONSHIPS : BRIDGING THE FUTURE, we will discuss how Social Work education, research and practice as well as social policy should move forward by finding

alternative responses to promote human well-being, so as to enable everyone to become fully integrated in their social life; developing actions and policies in order to ensure people's fundamental rights without losing sight of their abilities and capabilities; promoting the development of welcoming and educated local communities, empowered through people's participation.

These alternatives, in accordance with the founding principles of social work and social development, can build bridges between social actors in the community (public institutions, non-profit organizations, for-profit agencies, etc.) with the aim of creating a new network of solidarity.

[3rd Annual National Native Health Research Training Conference](#)

June 29-July 1, 2020 - Temecula, CA – [Look for updates online for rescheduling](#)

The 3rd Annual National Native Health Research Training Conference that will be held June 29- July 1, 2020 at the Pechanga Resort & Casino in Temecula, CA. This conference is co-organized by the U.S. Department of Health and Human Services Indian Health Service (HHS/HIS), the American Indian Higher Education Commission (AIHEC), and the American Indian Science & Engineering Society (AISES) and aims to build capacity and disseminate new and best practices for American Indian and Alaska Native (AI/AN) health research. This year's theme is "Governance, Trust and Culture" and in addition to plenary talks, the conference will include four concurrent session tracks: Behavioral Health, Biomedical and Health Systems Research, Traditional Medicine, and Traditional Ecological Knowledge/Environmental Health Sciences (TEK/EHS). For more details on how to participate in this conference and the concurrent session tracks, please click on the link above. The deadline to submit an abstract is May 4, 2020 and registration closes June 1, 2020.

[23rd International AIDS Conference](#)

July 6 – 10, 2020 – [DONE VIRTUALLY](#)

[Scholarships available for excellent training institute in July!](#)

July 26-31, 2020, University of California, Los Angeles

Applications are now being accepted for the 2020 mHealth Training Institute (mHTI). The week-long, residential program blends "deep dives" into the latest mHealth technologies and methodologies with team-science projects to provide the selected scholars with the transdisciplinary knowledge, competencies and collaborative networks required to tackle "wicked" healthcare problems.

[Missouri Prevention Science Institute Summer of R Training](#)

August 17-21, 2020 - Columbia, MO

The Missouri Prevention Science Institute on the University of Missouri Campus is hosting a Summer of R training from August 17-21, 2020. The training will focus on basic application in the education and social sciences and basic statistical training is required. The overall workshop will consist of four modules that can be attended separately or combined into a full week of training. Module I: Data Exploration and Linear Regression; Module II: Multilevel Modeling; Module III: Causal Inference; Module IV: Item Response Theory. Instructors are world renowned methodologists and include Drs. Francis Huang, Wolfgang Wiedermann, Wes Bonifay and Youngnam Kim.

[Arizona's Rural Women's Health Network: Online Sexual Violence Training for Community Health Workers](#)

Ongoing- online

The Arizona Rural Women's Health Network offers a 4-hour course that provides an introduction to basic knowledge and skills useful in assisting and responding to victims of sexual violence. The online course includes self-paced modules, a workbook, and a simulated role-play scenario. Learning objectives include: Identify and define types of sexual violence; Respond appropriately to victims of sexual violence; Relate individual and community partner roles in responding to and supporting victims of sexual violence; Recognize signs of burnout and vicarious trauma and learn about ways to cope. While

there are a few slides that contain Arizona specific statistics, most of the information provided is relevant in any state. Training is offered at no cost.

[Good Clinical Practice \(GCP\) Updated Course](#)

Ongoing- online

Here is a training module designed to prepare study staff responsible for the conduct of trials with human participants from protocol development through study closeout. The Good Clinical Practice (GCP) course is designed to prepare research staff in the conduct of clinical trials with human participants. The 12 modules included in the course are based on ICH GCP Principles and the Code of Federal Regulations (CFR) for clinical research trials in the U.S. The course is self-paced and takes approximately six hours to complete.

Stay tuned for this great on-campus opportunity

The ALACRITY Center will be conducting a grant writing “boot camp” in the near future. The plan will be to conduct this in alignment with February, June, and October grant submission deadlines. They will be sharing more details about content and timing in the near future and we will keep you posted.

Call for Papers:

[Journal of Asian American Studies Special Issue](#)

Viral Racisms: Asians/Americans and Pacific Islanders Respond to COVID-19

Deadline: June 1

From the first reports of the “coronavirus disease 2019” (COVID-19) outbreak in Wuhan, China in December, 2019 and the World Health Organization (WHO)’s declaration of COVID-19 as pandemic on March 11, 2020, xenophobic and anti-Asian rhetoric has exacerbated in the United States and globally. The U.S. president unapologetically insists on referring to COVID-19 as “the Chinese virus.” Consequently but not surprisingly, the increase of such racially-charged and scientifically incorrect rhetoric has been accompanied by the increase in microaggressions, discrimination, violence and hate crimes related to COVID-19 against Asian/American individuals, families and communities within the US and in the greater Asian diaspora (U.K., Canada, Italy, Australia, Brazil, etc.). Although the nature of the pandemic itself is ever shifting, it is critically important to bring the voices and experiences of Asians/Americans, Pacific Islanders, and allies to the center of the discourse from the periphery.

Please do contact the editors of the special issue with any questions at JAAS.covid19@gmail.com

[AAPI Nexus Journal: Asian Americans And Pacific Islanders Policy, Practice](#)

Inflection Point 2020: Coronavirus, Census and Elections for AAPIs?

Deadline: June 15, 2020

The year 2020 will reshape the future landscape of the United States and the world. As a watershed year in which three major events occur: the coronavirus pandemic, decennial census, and a presidential election. The convergence of these three could bring about wildly different outcomes that it represents an inflection point for our social, economic, health and political future. Issues at stake include fair political representation, faith in political institutions, affordable health care, protection of civil liberties, equitable economic recovery and immigrant rights. AAPI Nexus Journal asks what are the implications for the next ten to twenty years? We invite authors to share original research, resource papers, and informed opinion essays offering a perspective of how the coronavirus, census, presidential election or the interaction among the three will impact Asian Pacific America.

[The American Journal of Geriatric Psychiatry - COVID-19: Call for Papers](#)

To serve the needs of our readership and the clinical and scientific communities at large, the Journal invites a broad range of submissions related to COVID-19 and geriatric mental health. This may include case reports, case series, commentary articles, and narrative reviews. Subsequently, as more data are gathered, we anticipate publishing observational studies, and eventually longer-term epidemiological studies. As per editorial policy, all submissions will be subject to peer review, but we will expedite publication and all accepted papers related to COVID-19 will be made openly available and free of charge in the interest of public knowledge. We believe that in taking a proactive leadership role in this crisis, the Journal and the American Association for Geriatric Psychiatry (AAGP) will empower the scientific and global health community to effectively plan for the care of older adults, avoid the risk that this population is marginalized in policy discussions around COVID-19, and ensure that we generate the highest possible level of information to guide the most effective care at the critical time.

[Affilia: Journal of Women and Social work](#)

The journal writes to send our best wishes for your health and well-being during these difficult times and to alert you to a couple of publication-related issues.

In-Brief Submissions on COVID topics - It is clear that within the massively differential effect the pandemic is having across our communities, there are many emergent topics of urgency and relevance for feminist social work. We invite you to send us COVID-related In-Brief manuscripts which can be turned around quickly. The In-Brief format is designed for short reports and opinion pieces on current issues of relevance to feminist social work. It allows us to raise and discuss pressing issues of the day or to report on new developments and innovations, in a less prescribed format. Maximum page length is 10 pages, including references. Timelines - As authors or reviewers, you will be receiving the usual automated messages from the ScholarOne system about deadlines.

[Social Work Practice in the Era of the COVID-19 Pandemic: Challenges and Innovations](#)

October 15, 2020

The impact of the coronavirus disease (COVID-19) has and will continue to have tremendous impact on the health and social well-being for populations across the world. Social workers, like many other professions, are addressing these needs in direct service provision and planning efforts to ameliorate unprecedented disruption across health, social, and economic systems. In September 2019, the National Academies of Science, Engineering and Medicine released a consensus study entitled 'Integrating Social Care into the Delivery of Health Care: Moving Upstream to Improve the Nation's Health.' The emergence of COVID-19 has further underscored the powerful influence of the upstream social determinants of health on individual and population level health outcomes. Now, more than ever, is a critical time to address both social needs within the context of health care service delivery.

[Pandemics, Economics, Systems, and the Future of Social Work](#)

Deadline: November 1, 2020

The COVID-19 pandemic and resultant concatenated economic crises have changed the world dramatically. This special issue will seek to explore what social work should look like in the future—how can it be relevant, proactive, ethical, and play a role in creating a better future? How will or should our current crisis expand, enhance, and evolve social work as we know it?
