PURPOSE

The purpose of this course is to improve the nutritional status of infants, children and adolescents by updating health professionals in infant, child and adolescent nutrition at both the individual and public health level. The course will provide leadership training in pediatric/adolescent nutrition by developing high levels of clinical competence; provide instruction in nutrition needs and services for children, and providing training in systems of delivery of nutrition care. This course is designed for pediatric practitioners including dietitians, nurses, nutritionists, pediatric nurse practitioners, physicians and other professionals who are involved in the care of children.
