

Rhogam Administration Protocol

Blood type and Rh will be determined on each patient presenting for either medical or surgical abortion or management of early pregnancy loss.

1. All Rh negative patients will be offered Rhogam administration
2. Rhogam to be prescribed by physician
3. Informed consent will reviewed/performed by clinician- see consent form
4. Rhogam will be verified and patient will be identified by administering staff
5. Rhogam will be administered by IM injection by trained personnel
6. Document in patient chart
7. Documentation will be provided to the patient

Rhogam stock maintained in refrigerator in lab.

Refrigerator temperature log is checked daily by a designated MA staff member.

Expiration dates to be monitored monthly.
