Purpose:
1. Review elements discussed in the booklet titled “What are they talking about? – Simple meanings to vocabulary about education and how they can help you earn your diploma.”
2. Prepare middle school students for college.

There are approximately 45 cards:
- **Yellow**: easy (1 point)
- **Green**: more complex (2 points)
- **Orange**: difficult (3 points)

1. Divide the group into 3 teams.
2. Explain the 3 levels of difficulty (above) to the students.
3. Pick a team to go first; each team in turn picks a question.
4. They can choose which color/level of difficulty.
5. Record points on the board.
6. The team with the most points wins.
7. Alternate idea:
   a. As above, but if the team does not know the answer the other two teams can steal the points by answering the question – the stealing team does not loose their regular turn.

* Winning team can be given a prize.
