

Interested in the INFO Major?

Register for our reserved sections of INFO 200 & 201

INFO 200 Intellectual Foundation of Informatics (5) SSc

Introduces the intellectual foundations of information, including what it is; how people create, categorize, find, interpret, manipulate and use information; how human values shape the design of information, information technology, and information systems; and how these systems shape people, organizations, and society. Includes analytic, design, empirical, and technical skill development.

INFO 201 Foundational Skills for Data Science (5) RSN

Introduces fundamental tools, technologies, and skills necessary to transform data into knowledge, including data manipulation, analysis, and visualization, as well as version control and programming languages used in data programming. Students learn to work with real data, and reflect on the power and perils of using data to inform.

We have reserved sections for students a part of EOP, TRIO SSS, and Champions who are interested in registering in INFO 200 or INFO 201 for Autumn 2026 quarter

Reserved Sections

INFO 200 A & AD

INFO 201 C & CH
