Count of Successful Anglers

- 1 - 5
- 6 - 10
- 11 - 25
- 26 - 100
- 101 - 150

Projection: NAD 1983 HARN StatePlane Washington South FIPS 4602
Horizontal Units: Feet

0 20 40 80 Miles

*Successful is defined as those that caught and kept steelhead from any stream in the Quillayute system. It does not include released fish.

These data cover only those anglers that actually turned in their catch cards – a rough rule of thumb would be to multiply these counts by three to come up with actual totals.
