¹ The MBA programs have a cohort tuition structure (that is, there are different rates for incoming and continuing students). For these programs, it must be understood that the change in tuition is not applied to students but is applied to the rate for a category. For example, a Seattle MBA resident student who entered in Fall 2012 paid tuition of \$26,530; although the MBA resident continuing rate shows a 4% increase, the increase is applied only to that tuition category; the MBA student entering her/his second year will be charged tuition of \$26,530 for 2013-14.

² The DDS program also has a cohort tuition structure. Again, the tuition increase for a given tuition category should not be confused with the tuition increase that will be faced by students in a given cohort. For example, in the rate for second year DDS students increases 19% in FY14. This does not mean, however, that that the Class of 2017 faces a 19% tuition increase. Rather, resident students in the Class of 2017 were charged \$31,870 in 2012-13, and they will be charged \$35,060 in 2013-14. This represents a 10% increase for those students - not a 19% increase.
