¹ The School of Medicine recommends a Tier II increase no higher than 5%, but prefers no increase. The School of Social Work has planned for a 3% increase in Tier II tuition, but prefers no increase.

² The College of Engineering would be comfortable with a Tier III increase in the 3-5% range, with a preference for the lower end of that range.

³ The DDS program has a cohort tuition structure. The tuition increase for a given tuition category should not be confused with the tuition increase that will be faced by students in a given cohort. For example, the rates for third- and fourth year DDS students increase 10% in FY14 and 10% in FY15. This does not mean, however, that the class of 2017 faces a 10% tuition increase each year. Rather, resident students in the Class of 2017 were charged \$38,565 in 2014-15, and they will be charged \$42,417 in 2015-16 and \$43,131 in 2016-17. This represents a 10% increase in 2015-16, but only a 1.7% increase in 2016-17.

⁴ Contingent upon Graduate School recommendations for graduate tuition tiers. The College of the Environment recommends 3% increases each year, but percent increases for both College of the Environment Graduate Programs and MS in Earth and Space Sciences will match the Graduate School's final Tier II recommendations.

⁵ Contingent upon state resources to cover the costs associated with merit salary increases.

⁶ The MBA programs also have a cohort tuition structure (that is, there are different rates for incoming and continuing students). Again, for these programs, it must be understood that the change in tuition is not applied to students but is applied to the rate for a category. For example, a Seattle MBA resident student who entered in Fall 2014 paid tuition of \$29,250. Although the MBA resident continuing rate shows a 5% increase, the increase is applied only to that tuition category; the MBA student entering her/his second year will be charged tuition of \$29,250 for 2015-16.

⁷ The School of Public Health has proposed splitting the Master of Public Health category into 1st-year and continuing categories. They have also proposed moving the Public Health MS and other graduate programs into a new tuition category. The MPH 1st year and Public Health PhD categories would use continuing rates with revised title and scope.
