Open Spaces of Expression
multi-modal
 Temporal shifts in use
HEALTHY
maintain views
 daylight all creeks
 ridgeline community
celebrate existing infrastructure
WALKABLE
 linking open spaces
 Filter Runoff
 democratized shoreline
FLEXIBLE
 bicycles
 Living Space
 Diverse Shoreline Types & Habitats
mixed housing
INTEGRATED
 east-west paths
mixed use
celebrate region
FOSTER STEWARDSHIP
 green roofs, green skins
 streetcars
Flow / Arteries
Shoreline Vegetation
 opportunistic acquisition
EVOLVING...

Vision -- an outdoor environment that encourages residents to get out and walk (bike, kayak, etc) with rewards for doing so and ample opportunities to commune with nature in many different forms and to enjoy a myriad of recreations: a great variety of public and privately owned open spaces of different sizes and shapes. Mostly, the premier spaces will be along our waterways, but all residents will be within easy walking distance of a park. The next hundred years will witness the evolution of a healthy environment of integrated systems with opportunity for all citizens to be physically active with clean air, land and water for everyone.
