

Delete your cookies!

After a RIS upgrade, you should delete your browser cookies to avoid problems. This is a user specific setting. Each user will have to do this under their own AMC user logins for each PC they use.

Delete IE Cookies steps:

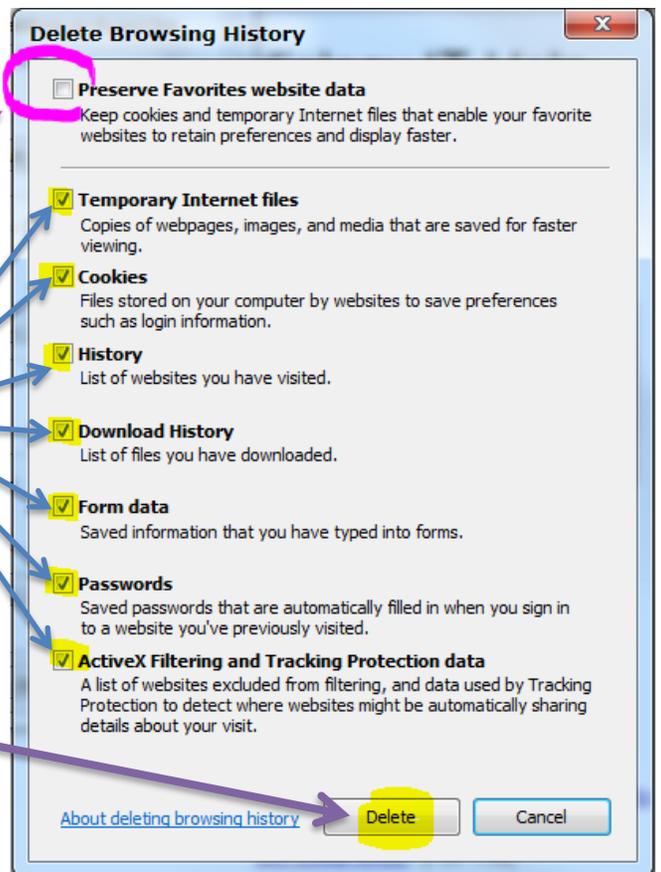

1. Launch Internet Explorer.

2. Press **CTRL + SHIFT + Delete**

3. **UNCHECK** the first box and **CHECK** all the rest.

4. Click **Delete**

5. **Close** all IE Browsers

6. **Restart** the PC

Try launching your RIS again, if it does not work, call IT Svc at 543-7012.
