*2nd Annual
Michael Kyte
Distinguished Lecture*

Designing Cities in the 21st Century

**Aligning what we know
with what we need**

Peter Koonce, P.E.
City of Portland

Peter is considered one of the most progressive transportation engineers in the United States, dedicating his life to innovative safety solutions. He manages Portland's Division of Signals, Street Lighting, & Intelligent Transportation Systems and is responsible for an annual budget exceeding \$13 Million. He serves on the National Association of City Transportation Officials and is Chair of the National Academy of Science Committee on Traffic Signal Systems.

Thursday, 28 September 2017, 4:00 pm
IRIC Atrium - University of Idaho
Reception Starting at 2:30 pm
