

PacTrans presents Dusty Rasmussen, PE, PTOE

UNIVERSITY OF WASHINGTON TRANSPORTATION SEMINAR

Transportation Operations Division 101: Seattle Department of Transportation

Monday, December 5 | 1:00 p.m. | More Hall 110

In this presentation Dusty will draw from his eight years of experience with the Seattle Department of Transportation to provide an overview of the Transportation Operations Division. He will cover their mission, vision, and organizational structure. He will present several accomplishments including highlighting several key projects. This presentation will include an overview of their current work plan including their equity framework. Finally, he will share some key insights into what have been working well and what has SDOT's TOD worried.

All events are free and open to the public. Reception to follow and all are welcome.

Dusty is the Interim Director of Transportation Operations. He has been working at the department since 2014. His background is in intelligent transportation systems design, operations and maintenance focusing on traffic control devices in the right of way, signal operations and our state-of-the-art 24/7 transportation operations center. He is a Professional Engineer (PE) and Professional Traffic Operations Engineer (PTOE) and has lead policy updates and development toward our shared departmental goals of Climate, Equity and Safety. He leads a staff of around 125 engineers, electricians, data analysis, IT professionals, permit specialist, and complaint investigators in this capacity.
