EVALUATION

North Cascadia Adaptation Partnership

Preparing for climate change through science-management collaboration

North Cascades National Park Climate Change Workshop

February 17, 2011

1. What did you learn about weather, climate, and future climate projections that you didn't already know?

2. What did you learn about the effects of climate change on hydrology and aquatic resources that you didn't already know?

3. What did you learn about the effects of climate change on terrestrial resources that you didn't already know?

4. What did you learn about the efforts the NPS is taking to address climate change at North Cascades NP?

5. Will this workshop change the way you do your job?
    a. If so, give an example of how.

    b. If not, tell us why not.

6. What topics were not covered that you would like to see covered?
