North Cascadia Adaptation Partnership

Preparing for climate change through science-management collaboration

Okanogan-Wenatchee National Forest Climate Change Workshop

February 23, 2011

1. What did you learn about weather, climate, and future climate projections that you didn't already know?
2. What did you learn about the effects of climate change on hydrology and aquatic resources that you didn't already know?
3. What did you learn about the effects of climate change on vegetation and wildlife resources that you didn't already know?
4. What did you learn about the efforts the USFS is taking to address climate change at OWNF?
5. Will this workshop change the way you do your job?
 - a. If so, give an example of how.
 - b. If not, tell us why not.
6. What topics were not covered that you would like to see covered?
