Researchers at Seattle Children’s want to find ways to improve families’ experiences in medical, diagnostic, and therapeutic services for children with a chronic health condition during and after the coronavirus pandemic.

Research is always voluntary!

Would the study be a good fit for me?
This study might be a good fit for you if:
- You read/write in English or Spanish.
- Have a child with a chronic health or neurologic condition such as (but not limited to) diabetes, asthma, congenital heart disease, CF, craniofacial or physical differences, epilepsy that require increased health monitoring.
- Your child is between the ages of 3 to 14 years.
- Experienced stay at home orders during coronavirus.

What would happen if I took part in the study?
If you decide to take part in the study, you would complete a one-time 20 minute online survey.

40 out of 200 families who take part get entered into a lottery to win a $25 gift card.

To take part in Parents Perceptions of Engagement in Telehealth and In-Person Services (PPE TIPS) research study:
https://redcap.seattlechildrens.org/surveys/?s=KP8YD KWR8D8EWN83

Or, for more information, please contact Hannah Rea, PhD at ppetips@seattlechildrens.org or (206)-221-9194.

The principal researcher for this study is Sara Jane Webb, PhD at Seattle Children’s Research Institute.
