

SCHOOL OF PHARMACY - FACTS AND FIGURES

VISION

To be recognized nationally and internationally as a leader in pharmacy education, research and service, who partners effectively with others in society to promote the discovery and development and appropriate use of pharmaceuticals for the public welfare and safety.

MISSION

- To prepare graduates for entry into a life-long career in the profession of pharmacy as providers of pharmaceutical care and as pharmacists who care for the well-being of others.
- To support and conduct research and provide graduate education in drug discovery and development, and in pharmaceutical outcomes research to improve decision-making regarding pharmaceutical therapy and policy.
- To support interdisciplinary and innovative approaches to health care that promote collaboration, diversity of thought, and mutual respect.
