

Looking for a clinical research opportunity this summer, 2012?

Research Associates (RAs) Programs

- Minimum: one, 4-hour shift per week in the emergency department
 - depending on # of RAs, serving additional shifts possible
- Enroll participants in studies on primary health care issues
 - tobacco cessation study
 - other research and/or clinical opportunities available
- Structured, clinical interactions within the research model
 - routinely see 100-150 ED patients and visitors per semester
- Performance assessments → end of semester evaluation
