

Robert Newman, MD, MPH
Director of the Global Malaria Programme
World Health Organization
Clinical Associate Professor
Department of Global Health
University of Washington

“Malaria Today: Challenges and Opportunities”

Robert D. Newman received his BA in English Literature from Williams College, his MD from Johns Hopkins University, and his MPH from the University of Washington. He is a pediatrician and is currently the director of the Global Malaria Programme at the World Health Organization in Geneva, Switzerland. As Country Coordinator of Health Alliance International in Mozambique in the late 1990s, he was astounded at the human toll of malaria in Africa. He has dedicated the last 15 years to combating the disease, first at the Centers for Disease Control and Prevention in Atlanta, and more recently at WHO. He believes that through relentless investment in scaling-up the malaria interventions we have today, developing new tools for tomorrow, and fostering leadership in affected countries, this ancient foe can be defeated.

Wednesday, April 17, 2013

2:30-3:30 p.m.: Lecture

Health Sciences Building

K-069 Auditorium

University of Washington

1959 NE Pacific St,
