Cool Jobs Series
Computer Science

Sunday, June 9 7:00 – 9:00 pm
Seattle Public Library - Central Library
Microsoft Auditorium
1000 Fourth Avenue, Seattle 98104

Event is FREE, but registration is required at seattlesciencefestival@pacsci.org

Over the next decade, there will be over 750,000 jobs in Computer Science. Learn first-hand from experts and innovators in this booming field!

Hadi Partovi is an entrepreneur and investor, as well as founder of educational non-profit Code.org. He is a strategic advisor to numerous companies including Facebook, Dropbox, Opower, and BlueKai.

Originally trained in applied and theoretical cryptography, Professor of Computer Science, **Yoshi Kohno**, conducts research focused on computer security and privacy for emerging and consumer technologies.

Professor **Oren Etzioni** is the Director of the Turing Center at UW and works at solving fundamental problems in Artificial Intelligence, particularly automatic learning from text and creating the next generation of search engines.

Moderator: Hélène Martin taught hundreds of Seattle high school students the power of computer programming, inspiring many to pursue degrees in technology. Now, a lecturer in UW's Computer Science & Engineering Department, her advice is: "Find what you care about and pursue it obsessively!"
