Case Studies in Children's Environmental Health Disparities • ENV H 417

Explore the intersection of health and environment for children around the world through real-life scenarios!

Spring Quarter 2015

T/TH 1:30 to 2:50 pm in RR-134

3 Credits

This newly designed course introduces students to the ways in which children are disproportionately affected by environmental health hazards. Through a series of engaging case studies, students learn the core scientific concepts of children's environmental health while exploring the social, cultural, regulatory, political, and economic factors that lead to children's health disparities.
