

UNIVERSITY *of* WASHINGTON

GABA and Behavior in Autism Research Study

Does your teenager and/or young adult have a diagnosis of **Autism**?
Do you have a diagnosis of **Autism**?

The University of Washington is looking for teenagers and young adults who have been diagnosed with an Autism Spectrum Disorder (ASD) to participate in a new research study exploring how the brain processes sensory information.

The study will involve up to 5 visits to the University of Washington. Over the course of the visits, participants will complete neurocognitive assessments (4-5 hours total), a blood draw (30 minutes total), and brain imaging (MRI) experiments (3-4 hours total).

Eligibility: Eligible participants must be 18 to 30 years old, must be diagnosed with ASD, and *must not be taking any psychiatric medications*.

Pay: Participants will be paid \$50 for the neurocognitive assessment visit and an additional \$20/hour for the MRI experiment visits.

Contact Information: Interested volunteers should contact the study coordinator at 206-616-2889 or rablab@uw.edu (please note: the confidentiality of information sent via e-mail cannot be ensured).
