

# Join our Team!

## The Microsoft Autism Hiring Program is expanding into the Microsoft Stores!

This Program represents one way we are evolving our approach to increase the diversity of Microsoft's workforce. We know there are talented candidates out there and roles available at our Stores that would set future employees up for a career. This two-day program is for people on the autism spectrum.

## Come as you are. Do what you love.

**If you work at a Microsoft store, you get the opportunity to showcase Microsoft devices and software to dynamic and diverse customers, small business owners and even enterprise employees.** You'll have the opportunity to help them through their technology journey creating loyal customers and fans for life! You will be part of an energizing team and something even greater—helping others to achieve more! And you will spend your days engaging with customers demoing virtual and mixed reality, showing off your skills on the Surface devices family using touch and pen, and even get an opportunity to play with customers on Xbox across the store!

## What to expect

Eligible candidates will be invited to the Microsoft Redmond Campus on March 27-28, 2019 to participate in an assessment program covering team building exercises and interview preparation. They will learn about different roles in our Stores and meet with other individuals passionate about technology. Candidates who fit the experience and skill set required for the role could be offered a position in the Microsoft Stores.

## Roles Available

Product Advisors  
Service Advisors
