

Are you the parent of a young child with autism?

Do you need help getting through everyday routines?

This research project is evaluating an **online training tutorial** designed to provide strategies for parents of children with autism to increase their child's engagement in everyday home routines.

To participate in this study, your child must...

- be between the ages of 18 and 60 months and
- live at home with you.

Your participation will involve:

- Completing the online tutorial
- Filling out online questionnaires before and after the tutorial about your child's behaviors and your own experiences
- Providing short videos of you and your child interacting during a daily routine
- Receiving compensation for your time
