Using this coloring book in a whole language approach I could introduce color words and nouns to students new to the Shashua language. I would make a teacher's copy, colored and laminated into book form as a sample. If the students choose to I would help each child to make a book he/she could use at home to be read by parents, or self. For more advanced students I would have them make up sentences for each picture.

Good idea / good project. A<sup>+</sup>
