PREFACE

The Teacher's Manual has been prepared for use with Yakima words as a basic instructional course. The series consists of common phrases used each day.

The lessons are designed to be used by the teacher in the classrooms as a basis for sentence structure and basic vocabulary. The teacher will stress oral drills, then as a review and reinforcement, the student may write phrases or sentences.

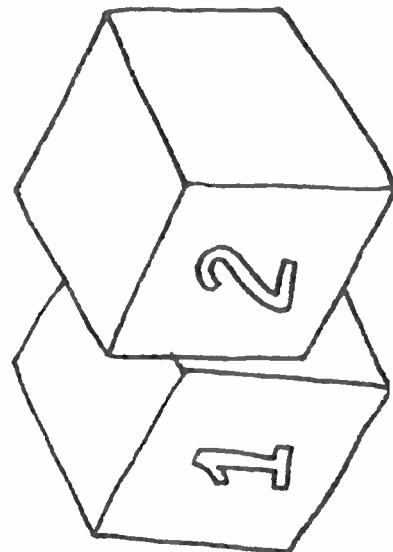

The Teacher's Manual contains suggested procedures for introducing the material and for practice and drill. Using the basic structures and vocabulary in the sentences, the student will listen, repeat, and practice with brief conversational exchange, substitutional drills, or a dialogue. The lessons are taught through oral drill and repetition.

MY PICTURE WORD DICTIONARY

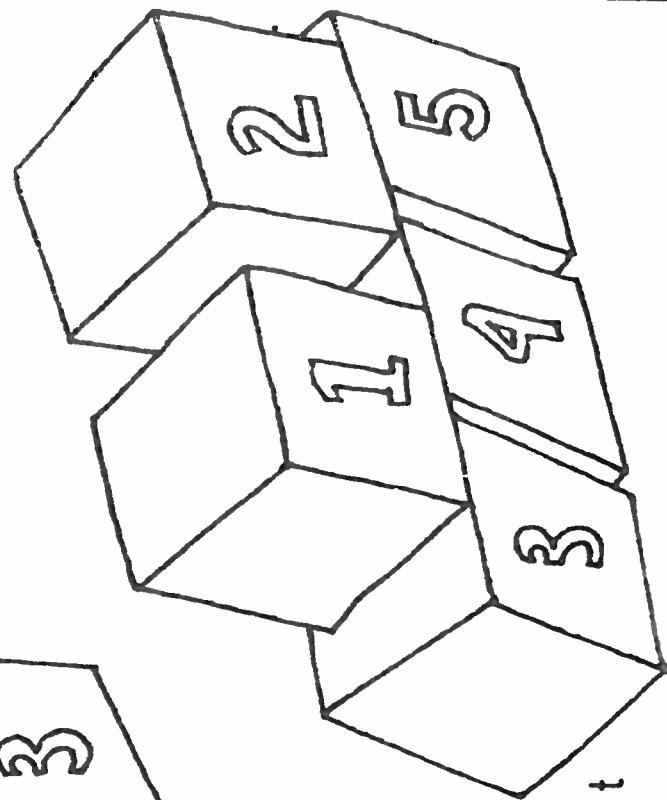

The dictionary contains letters of the alphabet. The student is introduced to the sounds he will hear in the words of the Yakima language. The student will listen to a word, then as the word is repeated, he will be instructed to imitate as accurately as possible. He will be guided in his imitation by his teacher and corrected for his mistakes. It is important for the student to listen to the sound so that he acquires the skill in making the new sound. They will repeat selected words or phrases over and over until they can say them without having to search his / her memory for the words. Gradually the language will vary, and the student will learn what is said and how the language is structured.

The word index is included in the back of each book.
