

Educational Policy Standards for Master's Degree Programs in Social Work Education

It is important to recognize that professional social work education is regulated through an accreditation process governed by the Council on Social Work Education (CSWE). The School's curriculum follows the CSWE's Educational Policy Standards, which is reprinted in these pages.*

1. Purposes

1.0 Purposes of the Social Work Profession

The social work profession receives its sanction from public and private auspices and is the primary profession in the development, provision, and evaluation of social services. Professional social workers are leaders in a variety of organizational settings and service delivery systems within a global context.

The profession of social work is based on the values of service, social and economic justice, dignity and worth of the person, importance of human relationships, and integrity and competence in practice. With these values as defining principles, the purposes of social work are:

- To enhance human well-being and alleviate poverty, oppression, and other forms of social injustice.
- To enhance the social functioning and interactions of individuals, families, groups, organizations, and communities by involving them in accomplishing goals, developing resources, and preventing and alleviating distress.
- To formulate and implement social policies, services, and programs that meet basic human needs and support the development of human capacities.
- To pursue policies, services, and resources through advocacy and social or political actions that

promote social and economic justice.

- To develop and use research, knowledge, and skills that advance social work practice.
- To develop and apply practice in the context of diverse cultures.

1.1 Purposes of Social Work Education

The purposes of social work education are to prepare competent and effective professionals, to develop social work knowledge, and to provide leadership in the development of service delivery systems. Social work education is grounded in the profession's history, purposes, and philosophy and is based on a body of knowledge, values, and skills. Social work education enables students to integrate the knowledge, values, and skills of the social work profession for competent practice.

1.2 Achievement of Purposes

Among its programs, which vary in design, structure, and objectives, social work education achieves these purposes through such means as:

- Providing curricula and teaching practices at the forefront of the new and changing knowledge base of social work and related disciplines.
- Providing curricula that build on a liberal arts perspective to promote breadth of knowledge, critical thinking, and communication skills.

- Developing knowledge.
- Developing and applying instructional and practice-relevant technology.
- Maintaining reciprocal relationships with social work practitioners, groups, organizations, and communities.
- Promoting continual professional development of students, faculty, and practitioners.
- Promoting interprofessional and interdisciplinary collaboration.
- Preparing social workers to engage in prevention activities that promote well-being.
- Preparing social workers to practice with individuals, families, groups, organizations, and communities.
- Preparing social workers to evaluate the processes and effectiveness of practice.
- Preparing social workers to practice without discrimination, with respect, and with knowledge and skills related to clients' age, class, color, culture, disability, ethnicity, family structure, gender, marital status, national origin, race, religion, sex, and sexual orientation.
- Preparing social workers to alleviate poverty, oppression, and other forms of social injustice.
- Preparing social workers to recognize the global context of social work practice.
- Preparing social workers to formulate and influence social policies and social work services in diverse political contexts.

2. Structure of Social Work Education

2.0 Structure

Baccalaureate and graduate social work education programs operate under the auspices of accredited colleges and universities. These educational institutions vary by auspices, emphasis, and size. With diverse strengths, missions, and resources, social work education programs share a common commitment to educate competent, ethical social workers.

The baccalaureate and master's levels of social work education are anchored in the purposes of the social work profession and promote the knowledge, values, and skills of the profession. Baccalaureate social work education programs prepare graduates for generalist professional practice. Master's social work education programs prepare graduates for advanced professional practice in an area of concentration. The baccalaureate and master's levels of educational preparation are differentiated according to (a) conceptualization and design, (b) content, (c) program objectives, and (d) depth, breadth, and specificity of knowledge and skills. Frameworks and perspectives for concentration include fields of practice, problem areas, intervention methods, and practice contexts and perspectives.

Programs develop their mission and goals within the purposes of the profession, the purposes of social work education, and their institutional context. Programs also recognize academic content and professional experiences that students bring to the educational program. A conceptual framework, built upon relevant theories and knowledge, shapes the breadth and depth of knowledge and practice skills to be acquired.

2.1 Program Renewal

Social work education remains vital, relevant, and progressive by pursuing exchanges with the practice community and program stakeholders and by developing and assessing new knowledge and technology.

3. Program Objectives

Social work education is grounded in the liberal arts and contains a coherent, integrated professional foundation in social work. The graduate advanced curriculum is built from the professional foundation. Graduates of baccalaureate and master's social work programs demonstrate the capacity to meet the foundation objectives and objectives unique to the program. Graduates of master's social work programs also demonstrate the capacity to meet advanced program objectives.

3.0 Foundation Program Objectives

The professional foundation, which is essential to the practice of any social worker, includes, but is not limited to, the following program objectives. Graduates demonstrate the ability to:

1. Apply critical thinking skills within the context of professional social work practice.
2. Understand the value base of the profession and its ethical standards and principles, and practice accordingly.
3. Practice without discrimination and with respect, knowledge, and skills related to clients' age, class, color, culture, disability, ethnicity, family structure, gender, marital status, national origin, race, religion, sex, and sexual orientation.
4. Understand the forms and mechanisms of oppression and discrimination and apply strategies of advocacy and social change that advance social and economic justice.
5. Understand and interpret the history of the social work profession and its contemporary structures and issues.
- M6. Apply the knowledge and skills of a generalist social work perspective to practice with systems of all sizes.
7. Use theoretical frameworks supported by empirical evidence to understand individual development and behavior across the life span and the interactions among individuals and between individuals and families, groups, organizations, and communities.

8. Analyze, formulate, and influence social policies.

9. Evaluate research studies, apply research findings to practice, and evaluate their own practice interventions.

10. Use communication skills differentially across client populations, colleagues, and communities.

11. Use supervision and consultation appropriate to social work practice.

12. Function within the structure of organizations and service delivery systems and seek necessary organizational change.

3.1 Concentration Objectives

Graduates of a master's social work program are advanced practitioners who apply the knowledge and skills of advanced social work practice in an area of concentration. They analyze, intervene, and evaluate in ways that are highly differentiated, discriminating, and self-critical. Graduates synthesize and apply a broad range of knowledge and skills with a high degree of autonomy and proficiency. They refine and advance the quality of their practice and that of the larger social work profession.

3.2 Additional Program Objectives

A program may develop additional objectives to cover the required content in relation to its particular mission, goals, and educational level.

4. Foundation Curriculum Content

All social work programs provide foundation content in the areas specified below. Content areas may be combined and delivered with a variety of instructional technologies. Content is relevant to the mission, goals, and objectives of the program and to the purposes, values, and ethics of the social work profession.

4.0 Values and Ethics

Social work education programs integrate content about values and principles of

ethical decision making as presented in the National Association of Social Workers Code of Ethics. The educational experience provides students with the opportunity to be aware of personal values; develop, demonstrate, and promote the values of the profession; and analyze ethical dilemmas and the ways in which these affect practice, services, and clients.

4.1 Diversity

Social work programs integrate content that promotes understanding, affirmation, and respect for people from diverse backgrounds. The content emphasizes the interlocking and complex nature of culture and personal identity. It ensures that social services meet the needs of groups served and are culturally relevant. Programs educate students to recognize diversity within and between groups that may influence assessment, planning, intervention, and research. Students learn how to define, design, and implement strategies for effective practice with persons from diverse backgrounds.

4.2 Populations-at-Risk and Social and Economic Justice

Social work education programs integrate content on populations-at-risk, examining the factors that contribute to and constitute being at risk. Programs educate students to identify how group membership influences access to resources, and present content on the dynamics of such risk factors and responsive and productive strategies to redress them.

Programs integrate social and economic justice content grounded in an understanding of distributive justice, human and civil rights, and the global interconnections of oppression. Programs provide content related to implementing strategies to combat discrimination, oppression, and economic deprivation and to promote social and economic justice. Programs prepare students to advocate for nondiscriminatory social and economic systems.

4.3 Human Behavior and the Social Environment

Social work education programs provide content on the reciprocal relationships between human behavior and social environments. Content includes empirically based theories and knowledge that focus on the interactions between and among individuals, groups, societies, and economic systems. It includes theories and knowledge of biological, sociological, cultural, psychological, and spiritual development across the life span; the range of social systems in which people live (individual, family, group, organizational, and community); and the ways social systems promote or deter people in maintaining or achieving health and well-being.

4.4 Social Welfare Policy and Services

Programs provide content about the history of social work, the history and current structures of social welfare services, and the role of policy in service delivery, social work practice, and attainment of individual and social well-being. Course content provides students with knowledge and skills to understand major policies that form the foundation of social welfare; analyze organizational, local, state, national, and international issues in social welfare policy and social service delivery; analyze and apply the results of policy research relevant to social service delivery; understand and demonstrate policy practice skills in regard to economic, political, and organizational systems, and use them to influence, formulate, and advocate for policy consistent with social work values; and identify financial, organizational, administrative, and planning processes required to deliver social services.

4.5 Social Work Practice

Social work practice content is anchored in the purposes of the social work profession and focuses on strengths, capacities, and resources of client systems in relation to their broader environments. Students learn practice content that encompasses knowledge and skills to work with individuals, families, groups, organizations,

and communities. This content includes engaging clients in an appropriate working relationship, identifying issues, problems, needs, resources, and assets; collecting and assessing information; and planning for service delivery. It includes using communication skills, supervision, and consultation. Practice content also includes identifying, analyzing, and implementing empirically based interventions designed to achieve client goals; applying empirical knowledge and technological advances; evaluating program outcomes and practice effectiveness; developing, analyzing, advocating, and providing leadership for policies and services; and promoting social and economic justice.

4.6 Research

Qualitative and quantitative research content provides understanding of a scientific, analytic, and ethical approach to building knowledge for practice. The content prepares students to develop, use, and effectively communicate empirically based knowledge, including evidence-based interventions. Research knowledge is used by students to provide high-quality services; to initiate change; to improve practice, policy, and social service delivery; and to evaluate their own practice.

4.7 Field Education

Field education is an integral component of social work education anchored in the mission, goals, and educational level of the program. It occurs in settings that reinforce students' identification with the purposes, values, and ethics of the profession; fosters the integration of empirical and practice-based knowledge; and promotes the development of professional competence. Field education is systematically designed, supervised, coordinated, and evaluated on the basis of criteria by which students demonstrate the achievement of program objectives.

5. ADVANCED CURRICULUM CONTENT

The master's curriculum prepares graduates for advanced social work practice in an area of concentration. Using a conceptual framework to identify advanced knowledge and skills, programs build an advanced curriculum from the foundation content. In the advanced curriculum, the foundation content areas (Section 4, 4.0–4.7) are addressed in greater depth, breadth, and specificity and support the program's conception of advanced practice.
