Sexy storytelling, performances, and anonymous audience confessions.

Sex, (almost) everybody does it and (almost) nobody talks about it – except at [Sexy Science] Tipi Confessions. From swapping specimen samples to relating to one another under the 'lab microscope' to .. c'mon... the big bang theory, science has a $p < 0.05$ of being statistically sexy. Tipi Confessions is produced by three Indigenous women and is an offshoot of the popular Austin, Texas show, Bedpost Confessions™, founded in 2010.
