

**The following centers are participating
in this important research:**

Cleveland Clinic
Cleveland, Ohio

Harvard Medical School -
Massachusetts General Hospital &
Brigham and Women's Hospital
Boston, Massachusetts

Northwestern University Feinberg School
of Medicine,
Chicago, Illinois

Queen's University
Kingston, Ontario, Canada

Stanford University Medical Center
Stanford, California

Temple University
Philadelphia, Pennsylvania

David Geffen School of Medicine at
UCLA & King-Drew Medical Center
Los Angeles, California

University of Maryland School of Medicine
Baltimore, Maryland

University of Mississippi Medical Center
Jackson, Mississippi

UW Medicine- Dept. of Urology
Seattle, Washington

University of Washington- Harborview
Medical Center, Seattle, WA & University
of Sciences Malaysia

THE MANY FACES OF CHRONIC PROSTATITIS

**Chronic prostatitis is a common
condition that affects men of all ages
and ethnic groups.**

**We are dedicated to improving
treatments for this condition.**

**Will you help us make
this happen?**

**Department of Health
and Human Services**

JOIN THE FIGHT AGAINST CHRONIC PROSTATITIS

Supported by the National Institute of Diabetes & Digestive & Kidney Diseases (NIDDK) of the National Institutes of Health (NIH), the Chronic Prostatitis Collaborative Research Network (CPCRN) was established to learn more about how to better diagnose and treat chronic prostatitis. These are important issues and *we invite you to participate* in this research.

CPCRN medical centers span the United States and reach into Canada and Malaysia. There may be one near you.

DO YOU HAVE CHRONIC PROSTATITIS?

Signs and symptoms may include:

- ◆ Pelvic pain and/or discomfort
- ◆ Frequent and urgent need to urinate
- ◆ Excessive urination during the night
- ◆ Pain or a burning sensation when urinating
- ◆ Pain related to ejaculation

THE STUDY

We are starting a multi-center study for men who have been recently diagnosed with chronic prostatitis and have not received a lot of past treatments for their symptoms.

YOU MAY BE ELIGIBLE TO JOIN THIS STUDY IF YOU...

- ◆ ...are 18 years of age or older
- ◆ ...have experienced pelvic pain and/or discomfort for at least six weeks
- ◆ ... have had symptoms that have bothered you enough within the past two years to see a doctor

IF YOU QUALIFY, YOU WILL BE ASKED TO:

- ◆ Take a study medication or placebo once a day
- ◆ Come for four (4) clinic visits over a 12- to 14-week period
- ◆ Undergo a physical exam and fill out questionnaires that ask about your symptoms over time

Randomized Clinical Trial #1: A Randomized Multicenter Double-Blind Clinical Trial to Evaluate the Efficacy and Safety of 10mg Alfuzosin in the Treatment of Chronic Prostatitis / Chronic Pelvic Pain syndrome (CP/CPPS) in Recently-Diagnosed and/or Newly-Symptomatic Alpha-blocker Naïve Patients

INTERESTED OR KNOW SOMEONE WHO IS?
