## The UW Autism Center's Training and School Services Team

is here to help schools provide evidence-based educational programs for students with autism spectrum disorders through in-person and web-based training and consultation **across Washington state** and the **Pacific Northwest**. Services range from brief training on a single topic to in-depth and ongoing training and consultation that prepare entire staff groups to effectively implement evidenced-based interventions.

## TRAINING WORKSHOPS

Our **experienced and multidisciplinary staff** provides workshops to meet the specific needs for **educational assistants, teachers, SLPs, OTs, administrators** and other school-based staff. In-person and web-based workshops are tailored to meet your specific needs. Topic areas may include:

- Basic Understanding of Autism
- Activities of Daily Living
- Applied Behavior Analysis (ABA)
- Supporting Communication
- Autism and Mental Health
- Autism Diagnostic Observation Schedule (ADOS-2)
- Addressing Challenging Behaviors
- Parent/Family Trainings
- Social and Emotional Development
- Supporting Adolescents and Adults with Autism

## CLASSROOM & PROGRAM-BASED CONSULTATIONS

UW Autism Center consultants provide classroom observations and consultations to help teachers and other school personnel implement **evidence-based practices** to maximize the learning of students with ASD. Areas of consultation may focus on working with school staff to:

- Use physical structure and visual supports
- Integrate different teaching methods based on the principles of ABA
- Replace challenging behaviors in the classroom
- Instruction on social and organizational skills
- Collect data to measure success

## STUDENT-FOCUSED CONSULTATIONS

UW Autism Center clinicians offer student-focused consultations to assist with **evaluations** and offer recommendations for **improving learning and behavior** for individual students.

Services may include:

- Independent Educational Evaluation (IEE)
- Functional Behavior Assessment (FBA) and Development of a Behavior Intervention Plan (BIP) to decrease problem behaviors and increase appropriate behaviors and skills
- Identifying student skill levels in requested domain (social skills, communication, executive functioning, behavior) and recommending strategies to promote student success
