

**Clinical Psychology Postdoctoral Fellow Positions (2)**  
**University of Washington Autism Center**  
**Center on Human Development and Disability**  
**Seattle, WA**

**Description:** The University of Washington Autism Center (Dr. Annette Estes, Director) is seeking up to two postdoctoral fellows for **12-month, full-time (100% FTE) appointments**, with optional renewal subject to approval, satisfactory performance, and availability of funding. The UW Autism Center is affiliated with the Center on Human Development and Disability, an outstanding institutional resource offering an array of research, clinical services, training, outreach, and dissemination activities through its dual designation as a Eunice Kennedy Shriver Intellectual and Developmental Disabilities Research Center (IDDRC) and a University Center for Excellence in Developmental Disabilities (UCEDD).

**School-age track:** This position will combine clinical and research training to develop expertise working with school-age children with autism spectrum disorder (ASD). Previous experience or interest in assessing and treating comorbid sleep problems is preferred but not required. Primary responsibilities of the fellow will include: 1) cognitive and diagnostic assessments of school-age children with and without autism, 2) multi-method assessments (including actigraphy, clinical interview, and parent-report questionnaires) and treatment of behavioral sleep disturbances in children with ASD seen in our Sleep Clinic, 3) data analysis and preparation of manuscripts for publication. This position is open, with the latest start-date September 2020.

**Infant track:** This position will combine clinical and research training in working with infants with or at risk for neurodevelopmental disorders. Primary responsibilities of the fellow will include: 1) developmental assessments with infants with Down Syndrome or at risk for autism spectrum disorder (ASD) seen through our research studies, 2) comprehensive diagnostic assessments and treatment planning for infants seen in our Infant Clinic, 3) ASD assessments across the lifespan, 4) data analysis and preparation of manuscripts for publication. This position is open, with the latest start-date September 2020.

For fellows on either track, additional opportunities exist for supervising trainees, grant writing, intervention, community presentations, and other clinical or research-related training experiences based on the interests of the fellow.

**Minimum Qualifications:** Applicants must have a Ph.D. in clinical or educational psychology by the date of hire. ABD status is acceptable at the time of application, but terminal degree must be awarded by date of hire. Prior experience working with children with ASD (School-age track) or infants (Infant track) is preferred, but not required.

**Applications:** Applicants should send letter of interest, curriculum vitae, sample assessment report (de-identified), and contact details for three references to [larrisonk4@uw.edu](mailto:larrisonk4@uw.edu). Please specify in your email which track (i.e., School-age, Infant, or both) you would like to be considered for.

*University of Washington is an affirmative action and equal opportunity employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, gender expression, national origin, age, protected veteran or disabled status, or genetic information.*
