

ABA LAUNCH Program

The University of Washington Autism Center's ABA LAUNCH Program is a clinic-based, short-term, comprehensive and intensive early intervention program for children up to six years of age with a diagnosis of Autism Spectrum Disorder (ASD). This program offers an initial foundation of evidence-based, high-quality, Applied Behavior Analysis (ABA) services and parent education/support to families currently waiting to receive ongoing therapy services.

What is included in the program?

- 12 weeks ABA therapy sessions at our clinic; 4 days a week, 3 hours a day
- Multi-disciplinary team of psychologists, speech language pathologists (SLP), board certified behavior analysts (BCBA), and certified behavior technicians (CBT)
- 1:1 direct intervention w/ behavior technician
- 1:1 and group SLP sessions
- Weekly parent coaching sessions w/ BCBA
- Individualized resource sharing and transition planning sessions with parents of each client
- Weekly parent psychoeducation classes
