

Washington Park Arboretum

Spring-time Scavenger Hunt

The future of every
flower is a seed!

It's important to NOT pick
flowers (or any other living
thing), so there will be many
more seeds for the future
and many more flowers.

**Be a beginning botanist: Look, Listen,
Hear, Smell, Record and Enjoy!**

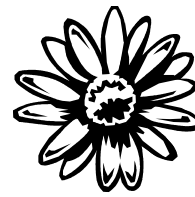

Find something red. What is it?

Find something green. What is it?

Find something blue. What is it?

Find something yellow. What is it?

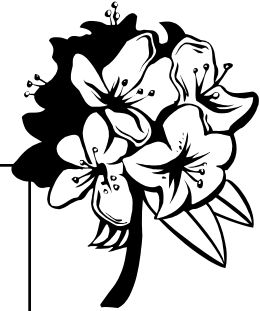

Find something pink. What is it?

Find something red. What is it?

Find something green. What is it?

Find something blue. What is it?

Find something yellow. What is it?

Find something pink. What is it?

Find a flower that smells sweet.
Can you name the flower?

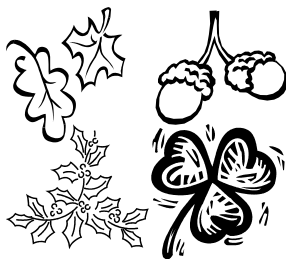

Find a flower that smells stinky.
Can you name the flower?

Find a flower that has no smell.
Can you name the flower?

Find the following:

- Two different types of seeds.
- A very big leaf.
- A very small leaf.
- A leaf with smooth edges.
- A leaf with jagged edges.

Close your eyes and listen.
Write down all the sounds you heard.

Thank you for coming to Washington Park Arboretum! Did you know Arboretum means Tree Place in Latin? Now you do!
