LINEHAN SUICIDE ATTEMPT-SELF-INJURY INTERVIEW (SASII) -STANDARD (SHORT) VERSION -2006

S1 (PHISO2) At any time in the last year [your life, since last assessment, etc.] have you deliberately harmed or injured yourself or attempted suicide?  (0 = No, 1 = Yes).

S2 (PHISO3) How many times have you deliberately harmed or injured yourself or attempted suicide in the last year [your life, since last assessment, etc.]?

S3 (PHISO4) INTERVIEWER: HOW RELIABLE IS THIS NUMBER?  (0 = Unreliable, 1 = Somewhat reliable, 2 = Reliable)

S4 (PHISO5) HOW MANY EPISODES WERE COUNTED AS THRESHOLD “SUICIDE ATTEMPT/INTENTIONAL SELF-INJURY”? (Answer at end of interview)

Use this horizontal dateline to note suicide attempts or intentional self-injury episodes, in chronological order. Start in the lower right corner, on the first line, and move from right to left. Make a short vertical mark for each suicide attempt/intentional self-harm. Next to the mark, write the date of the episode, the method and if the subject received medical treatment as a result. Circle any events that the subjects describe as suicide attempts. Any further details should be written in the body of the interview.

03  (PH03)  Think back to the most recent time (time before that) when you harmed yourself. Was this a single event or a series or cluster of events?

INTERVIEWER: RATE EPISODE AS A SINGLE EVENT OR CLUSTER OF EVENTS.
0 = Single event. An act clearly remembered and/or distinguishable from another act by any detail.
1 = Cluster of events. A repetitive or habitual series of low lethality acts in which all circumstances were identical, or a series of acts so poorly recalled by subject such that acts cannot be differentiated from each other in any way other than count.

DESCRIBE BASIS FOR LABELING AS A CLUSTER:

7.17 = Other:
INTERVIEWER: RATE MEDICAL RISK OF DEATH BASED ON METHOD AND ON OTHER
SUBSTANCES PRESENT AT TIME
1 = Very low. Less than/equal to 5 pills (unless medication potentially lethal in low doses); scratching;
reopening partially healed wounds; head banging, swallowing small, non-sharp objects; going
underdressed into cold for brief time, lying down at night in the middle of a non-busy road but getting up
when a car doesn’t come or swimming out to middle of lake and returning upon getting tired. Minor
heroin overdose 1.5 times usual dependent dose.
2 = Low. Superficial cut on surface or limbs; 6-10 pills (or fewer if medication potentially lethal in low doses);
cigarette burn(s), jumping feet first from very low place (less than 10 feet). Heroin overdose 1.5 times
usual dependent dose combined with other drugs and/or alcohol.
3 = Moderate. Overdose on 11-50 pills or two or more types of pills or 6-10 pills potentially lethal in low doses
and combined with alcohol; deep cuts anywhere but neck, swallowing ≤ 12 oz shampoo or astringent, ≤ 2
oz. lighter fluid, or ≤ 4 tbsp. cleaning compounds; igniting flammable substance on limb. Moderate heroin
overdose 2 - < 3 times usual dependent dose.
4 = High. Overdose with over 50 pills or 11-30 pills potentially lethal in low doses or combined with large
amount of alcohol, stabbing to body; pulling trigger of a loaded gun aimed at a limb (arm or leg),
swallowing > 2 oz lighter fluid, > 12 oz shampoo or astringent or > 4 tbsp. cleaning compounds, igniting
flammable substance on multiple limbs and torso, walking into heavy traffic.
Heroin overdose 2 - < 3 times usual dependent dose combined with other drugs and/or alcohol.
5 = Very high. Overdose with over 30 pills lethal in small doses or combined with large amount of alcohol;
poison (unless small amount not potentially lethal); attempted drowning; suffocation; deep cuts to the
throat or limbs; jumping from low place (less that 20 feet), igniting flammable substance all over body,
electrocution, throwing self in front of or from car going less than 30 miles/hr, strangulation. Serious
heroin overdose 3 or more times usual dependent dose.
6 = Severe. Pulling trigger of loaded gun aimed at vital area (such as torso or head); Russian roulette, jumping
from a high place (more than 20 feet); hanging (feet above the ground); asphyxiation (such as carbon
monoxide suffocation); jumping in front of auto going faster than 30 miles/hr or off overpass in rush hour
traffic, attempted drowning after ingesting alcohol or other drugs, swallowing nail polish remover,
turpentine or similar substances. Serious heroin overdose 3 or more times usual dependent dose combined
with other drugs and/or alcohol.

INTENT

At the time of your self-injury/suicide attempt/overdose, what final outcome did you most intend and expect?
(RECORD ANSWER VERBATIM.)

Just before or at the time of this self-injury/overdose, were you thinking about suicide or wishing you were
dead?

0 = Not at all
1 = I was wishing I was dead, but the thought of suicide did not go thru my mind
2 = The thought of suicide passed thru my mind
3 = I briefly considered it, but not seriously
4 = I was thinking about it and was somewhat serious
5 = I was very serious about dying but was also somewhat ambivalent
6 = I was extremely serious, intended to die and was not ambivalent at all

IMPULSIVITY AND PROBABILITY OF INTERVENTION

17 (PH31) Did you plan your self-injury/suicide attempt/overdose, or was it an impulsive act? (RECORD ANSWER VERBATIM)

17a (PH31a)
________________________________________________________________________
________________________________________________________________________

INTERVIEWER: RATE IMPULSIVITY OF ACT.
1 = Commitment to act, followed by very careful or elaborate plan carried out over a period of time.
2 = Actively planned and/or got implements. Had impulse, resisted for _____ days, then acted.
3 = Actively planned and/or got implements. Had impulse, resisted for less than 24 hours.
4 = No active planning. Had impulse, resisted for _____ days, then acted.
5 = No active planning. Had impulse, resisted for less than 24 hours, then acted.
6 = No active planning. Occurred impulsively, with no forethought and without very strong emotion.
7 = No active planning. Occurred impulsively, with no forethought and with very strong emotion.

18 (PH17) At the time or near the time of this episode, did you write a suicide note? (0 = No, 1 = Yes)

19 (PH32) Did you arrange your self-injury/suicide attempt/overdose in such a way that it would be difficult for anyone to find, stop, or save you? (0 = No, 1 = Somewhat, 2 = Yes) Describe the circumstances: (RECORD ANSWER VERBATIM.)

________________________________________________________________________

20 (PH33) INTERVIEWER: RATE PROBABILITY OF INTERVENTION BASED ON ALL INFORMATION

1 = Chance of intervention remote. Act committed by person in a solitary or isolated place without access to telephone (i.e., a wooded area, cemetery, etc.).
2 = Improbable intervention. Act committed by person alone, with intervention by a passerby possible although not expected (i.e., in a motel room, an office late at night, at home alone with no one expected).
3 = Ambiguous chance of intervention. Act committed by person alone, with no certainty of immediate assistance. However, a reasonable chance for intervention existed (i.e., the victim is aware of the impending arrival of others).
4 = Probable intervention. Act committed with another person in the immediate vicinity but not visibly present (such as in the same dwelling/building). Or made phone call but did not directly communicate intention.
5 = Certain intervention. Act committed in the presence of another person/made phone call immediately before or after in order to advise of act or to say good-bye.
LEVEL OF MEDICAL TREATMENT

21. Following your self-injury/suicide attempt/overdose were you taken to any of these places or did you turn to any of these places or people for help? (Give Card B); 0 = Not contacted, 1 = Contacted).

22 ______(PH37) What was your physical condition afterward? (RECORD VERBATIM ANSWER.)

22a (PH37a) ____________________________________________________________

22b RECORD INFORMATION FROM MEDICAL RECORDS (PH37b)

____________________________________________________________________________________________

INTERVIEWER: RATE PHYSICAL CONDITION FOLLOWING EPISODE

0 = No effect
1 = Very mild effect. Death impossible.
   (e.g., went to sleep at regular time, woke up ok; slightly queasy or nauseous, but no vomiting; rash type abrasion, bruise; chilled; small non-sharp objects in digestive tract)
2 = Mild effect. Death is highly improbable; could only occur due to secondary complications or very unusual circumstance.
   (e.g., nausea; slept significantly more than normal, woke up ok; 1st degree burn; superficial lacerations without tendon, nerve or vessel damage and not requiring sutures; minimal blood loss; larger non-sharp objects in digestive tract)
3 = Moderate effect. Death is improbable; could only occur due to secondary effects; medical aid is warranted, but not required for survival.
   (e.g., vomiting; slept significantly more than normal, woke up still drowsy; 2nd degree burn; non-septic infection; shallow lacerations on limbs or torso with slight tendon damage requiring sutures; broken digits or limbs; slight to moderate hypothermia or frost bite; slight concussion with no disorientation)
4 = Severe effect. Death is improbable if first aid or medical attention is administered.
   (e.g., respiratory failure, elevated blood pressure, convulsions or seizures; 3rd degree burn covering 20% or less of body surface; septicemia; deep lacerations on face, limbs or torso with tendon damage or severing and possible nerve, vessel or artery damage; cuts on neck which may require sutures but no major nerves or vessels severed; blood loss less than 100 cc.; bullet in or deep piercing of limbs; severe head injury with decreased orientation; moderate tissue damage; sharp objects in digestive tract; vertebral fracture without cord injury)
5 = Very severe effect. Death is somewhat probable unless first aid or medical attention is administered.
   (e.g., caustic substance; hypertensive crisis; stroke; 3rd degree burn covering 40% of body surface; severe, deep lacerations on face, limbs or torso with severing of major arteries; blood loss more than 200 cc; loss of eye, ear or digits; bullet or deep piercing in lower torso; severe tissue loss; vertebral fracture with cord injury; mild hypoxia; comatose but still responding to pain)
6 = Extremely severe effect. Death is highly probable without out immediate and vigorous medical attention, and may occur even with vigorous first aid or medical attention.
   (e.g., 3rd degree burn covering 50% or more of body surface; loss of limb; deep lacerations on neck with major artery damage, i.e., cutting jugular vein; irreparable damage and/or systemic organ failure; gun shot or bullet in chest or head; closed airways, severe hypoxia and/or respiratory arrest; severe hypothermia; cardiac arrest; comatose and not responding to pain)
7 = Lethal effect. Death occurred.
23. INTERVIEWER: USE ALL APPROPRIATE INFORMATION REGARDING TREATMENT THAT HAS BEEN GATHERED THROUGHOUT INTERVIEW TO CODE HIGHEST APPLICABLE NUMBER FROM LIST BELOW
0 = No medical treatment sought/required
1 = Went to emergency room or physician, had no medical treatment or assessment and went home (e.g., talked to social worker or resident and left)
2 = Went directly to an in-patient psychiatric unit
3 = Medically treated while on in-patient psychiatric unit, without going to emergency room
4 = Went to emergency room or physician, was medically treated and went home
5 = Went to emergency room, was treated and admitted to psychiatry unit
6 = While on psychiatric unit, went to emergency room for medical treatment and then returned to psychiatric unit
7 = Admitted to medical unit, whether or not via emergency room, for observation (hours to overnight)
8 = Admitted to medical unit, whether or not via emergency room, for required treatment
9 = Admitted to intensive care unit, whether or not via emergency room or medical floor
10 = Mortuary

42. How many days (of school) did you miss because of your self-injury? (CODE = “-8” IF SUBJECT NOT ENROLLED)

24. INTERVIEWER: RATE SUBJECT’S INTENT TO DIE, I.E., THE SERIOUSNESS OR INTENSITY OF THE WISH TO TERMINATE HIS OR HER OWN LIFE. RATINGS SHOULD REFLECT YOUR BEST ESTIMATE BASED ON ALL INFORMATION.
1 = Obviously no intent
2 = Only minimal intent
3 = Definite intent but very ambivalent
4 = Serious intent
5 = Extreme intent (careful planning and every expectation of death)

DESCRIBE REASON FOR RATING: 24a

25. INTERVIEWER: BASED ON DEFINITION OF SASII ON APPENDIX, CATEGORIZE BEHAVIOR. CODING SHOULD REFLECT YOUR BEST JUDGMENT BASED ON ALL INFORMATION.
1 = Accidental self-harm, without undue risk taking and without unreasonable expectation of safety
2 = Accidental self-harm, with undue risk taking or with unreasonable expectation of safety
3 = Victim-precipitated self-harm, without intent to be harmed by others but with undue risk taking or with unreasonable expectation of safety
4 = “Victim-precipitated” self-harm with intent to be harmed by other
9 = OTHER, including absence of a behavior, which results in harm or illness (e.g., stopped taking important medicines such as insulin)
5 = Intentional self-injury, but not a suicide attempt
6 = Ambivalent suicide attempt
7 = Suicide attempt with no ambivalence
8 = Suicide attempt that is a “failed suicide”, with continued life purely accidental and a near miracle
Supplemental and experimental questions for the Suicide Attempt Self-Injury Interview

26. (PH23) If you had to pick one thing that you think most triggered your self-injury/suicide attempt, what would you say it was? (PROBE FOR MAIN PRECIPITATING EVENT) (PH27)

____ 26a. Did that happen on the day you injured yourself/attempted suicide? (0=no, 1=yes) (PH27a)
____ 26b. IF NO: did that happen right before you felt the urge to injure yourself or attempt suicide? (0=NO, 1=YES) (PH27b)

IF NO TO BOTH: In thinking about the trigger, ask yourself what was it about that particular day and that particular time that was different. What was the “straw that broke the camel’s back” that triggered your action or your final decision to act? What was different about the day you harmed yourself from a day or a week before or after? Why did you injure yourself on that particular day, as opposed to the day before or the week before? What specific events, thoughts, or feelings were most important?

27. Did any of the events or experiences on this list happen to you in the 24 hours before your self injury/suicide attempt? Give Card D (0 = Not mentioned, 1= Mentioned) ASSESSOR CHECK ALL ITEMS LISTED BY CLIENT.
