

# Native People for Cancer Control

---

*Working together to provide cancer education, outreach and training in Tribal communities*

---

Native People for Cancer Control (NPCC) works with Tribal community members, leaders, researchers, clinicians, educators, and outreach workers to address cancer education, training, research and planning. We work with our partners to provide:

- Cancer education, outreach, health promotion, and cancer prevention activities.
- On-site and distance-delivery cancer education and digital storytelling workshops.
- Community-level research around colorectal cancer screening, health communication, and cancer risk factors.
- Research training opportunities for American Indian and Alaska Native investigators and students.
- Assistance with identifying and reducing cancer-related health gaps.

We work with Tribes in Alaska, Washington, Oregon, Idaho, Montana, Wyoming, North Dakota, and South Dakota. To find out more information about our programs and trainings, please email [npccinfo@uw.edu](mailto:npccinfo@uw.edu).
