

# Impact of the Frye Art Museum's *here:now* Program on Quality of Life and Relationships

Lee Burnside MD MBA  
University of Washington  
Division of Gerontology and Geriatrics

## Quality of Life Dementia (Lawton)

Assessment should include subjective and objective measures

1. Psychological well-being (positive and negative affect)
2. Behavioral competence (cognitive and functional abilities)
3. Objective environment (caretakers and living situation)
4. Perceived QOL
