

The University of Washington has two types of Honors Degrees: College Honors and Departmental Honors (see reverse)

### COLLEGE HONORS

To graduate with College Honors (diploma will read "With College Honors"), students must complete **BOTH** the Honors Core **AND** Departmental Honors requirements in their major. Students must apply for and be accepted to their major's departmental honors program even if they have already been admitted to College Honors:

HONORS CORE		+	DEPARTMENTAL
<p><u>Honors Civilization*</u> (Complete any 3 courses)</p> <p>HONORS 251, 252, 253 HONORS 261, 262, 263 HIST 111, 112, 113** SIS 200, 201, 202** ARCH 350, 351, 352**</p> <p><b>**HONORS SECTION ONLY</b></p>	<p><u>Natural Science</u> (Complete any 1 sequence)</p> <p>PHYS 121, 122, 123 (HONORS LECTURE AND SECTION)</p> <p>MATH 124, 125, 126 (HONORS LECTURE AND SECTION)</p> <p>MATH 134, 135, 136 MATH 334, 335, 336 CHEM 145, 155, 165 CHEM 335, 336, 337 BIOC 440, 441, 442 (HONORS SECTION ONLY)</p> <p>BIO 180, 200, 220 <i>with</i> Honors Biology Seminar</p>	<p><u>Additional Honors Courses</u> (Complete any 3 courses)</p> <p>Any combination of any 3 Honors Civilization and Honors Natural Science courses approved by the Honors Program as applying towards the Honors Core requirement.</p>	<p><u>Departmental Honors</u> (9 Credits)</p> <p>Honors Engineering students are required to complete a total of 9 Honors credits, with at least 3 credits of Departmental 499H Special Projects (or ENGR 499H). The remaining honors credits can be fulfilled with either special projects or Ad Hoc courses. Through the Ad Hoc option, students can contract with the instructor in a given course to complete additional work and obtain Honors credit.</p>

**Honors Core (45 Credits) overlaps with the College of Engineering General Education Requirements.**

\* If only 15 credits of Civilization courses are taken, students must complete additional credits of VLPA or I&S courses in order to satisfy the Engineering Areas of Knowledge requirements. Please see an Honors adviser to discuss this possibility. Also, **ALL** students in the College of Engineering must still complete requirements in English Composition. *The 'HONORS' course prefix replaced the 'H A&S' prefix beginning Summer 2009.*

**Ad Hoc:** Students may fulfill up to 15 credits of Honors Core requirements by completing an ad hoc project in a non-Honors course outside of the major or via a non-Honors study abroad. See an Honors Program adviser for more information before beginning the course or program.

## DEPARTMENTAL HONORS

*(These requirements do NOT apply to College Honors Students)*

To graduate with Departmental Honors (diploma will read "with Distinction"), students must complete the standard College of Engineering General Education requirements plus the requirements for Departmental Honors in their major.

<u>College of Engineering General Education Requirements</u>	<u>Departmental Honors</u>
--	----------------------------

(9 Credits)

*Same requirements as described on reverse.*

*Departmental requirements for graduating with honors vary by major and are established by the University's individual departments. Please check with your departmental adviser for details.*
