

Professor Fabien received his B.S. degree in mechanical engineering from The [City College, New York](#).

He received his M.S and Ph.D. degrees in mechanical engineering from [Columbia University, New York](#).

Before joining academia he worked at Perkin-Elmer in Danbury Connecticut where he was the lead mechanical engineer for the construction of the Optical Control Sensor of the Hubble Space Telescope.

Prior to joining the University of Washington he was an Assistant Professor in the Department of Mechanical Engineering at [Ohio University](#). At the [University of Washington](#) Professor Fabien is currently the chair of the [Faculty Council on Student Affairs](#). His research interests include: (i) the modeling and control of multidiscipline dynamic systems, (ii) nonlinear optimal control theory and computation, and (iii) mechatronic system design.
