# State of the Health Workforce in Rural America Profiles and Comparisons

## ABOUT THE AUTHORS

**Eric H. Larson, Ph.D.**, is Deputy Director at the WWAMI Rural Health Research Center, Department of Family Medicine, University of Washington School of Medicine.

**Karin E. Johnson, Ph.D.**, is a Research Associate in the Department of Family Medicine, University of Washington School of Medicine.

**Thomas E. Norris, M.D.**, is Associate Dean of the University of Washington School of Medicine and a Professor in the Department of Family Medicine.

**Denise M. Lishner, M.S.W.**, is Associate Director for Administration at the WWAMI Rural Health Research Center, Department of Family Medicine, University of Washington School of Medicine.

**Roger A. Rosenblatt, M.D., M.P.H.**, is a Professor and the Vice Chair in the Department of Family Medicine, University of Washington School of Medicine.

**L. Gary Hart, Ph.D.**, is Director of the WWAMI Rural Health Research Center and Professor in the Department of Family Medicine, University of Washington School of Medicine.

## ABOUT THE WWAMI RURAL HEALTH RESEARCH CENTER

The WWAMI Rural Health Research Center (RHRC) is one of six centers supported by the Federal Office of Rural Health Policy, a component of the Health Resources and Services Administration (HRSA) of the Public Health Service. The major focus of the WWAMI RHRC is to perform policy-oriented research on issues related to rural health care. Specific interests of the Center include the training and supply of rural health care providers and the content and outcomes of the care they provide; the

availability and quality of care for rural women and children, including obstetric and perinatal care; and access to high-quality care for vulnerable and minority rural populations.

The WWAMI RHRC is based in the Department of Family Medicine at the University of Washington School of Medicine, and has close working relationships with the WWAMI Center for Health Workforce Studies, Programs for Healthy Communities, and the other health science schools at the University, as well as with other major universities in the five WWAMI states: Washington, Wyoming, Alaska, Montana, and Idaho. The University of Washington has over 30 years of experience as part of a decentralized educational research and service consortium involving the WWAMI states. The activities of the WWAMI RHRC are not only focused on national issues, but also the particular needs and challenges in these states. The WWAMI RHRC also works closely with the associated Area Health Education Centers and state departments of health.

## ACKNOWLEDGEMENTS

This work was supported by the Federal Office of Rural Health Policy (FORHP) through the WWAMI Rural Health Research Center (grant #1U1CRH00035-03). We especially thank Marcia Brand, Director, FORHP, and Joan Van Nostrand, Research Director, FORHP, for their encouragement and support. We greatly appreciate Ms. Martha Reeves' word processing assistance and Ms. Alice Porter's editing. However, opinions and errors in this volume are the sole responsibility of the authors.
