

HAZARD TREE REMOVAL

- A potentially hazardous Bigleaf maple is scheduled for removal, April 1, '08.
- Located adjacent to Arboretum Dr. and upper Rhododendron Glen trail, both high-risk targets.
- It sustained a major trunk breakout in the '06 Chanukah eve windstorm and continues to show signs and symptoms of decline, therefore removal is the best course of action to abate future risk of major trunk and limb failures.
- Arboretum Dr. will be closed to all vehicular and pedestrian traffic during removal.
- We apologize for any inconvenience this may cause. Public safety is #1!
- This notice is also posted at tree.
