

J. A. Witt Winter Garden: SE Bed Renovations

Coming Attractions:

Acer tegmentosum 'Joe Witt'

Daphniphyllum macropoda

Polystichum neolobatum

Project Scope:

- Removal of American elm week of Sept. 14. Urban Hardwoods will fabricate a table from salvaged elm trunk.
- Removal, relocation or protection of other UW plant collections in project area
- Followed by bed re-grading and soil remediation
- 2009-2010 Fall and Winter planting of new winter-interest trees, shrubs and groundcovers
- This project will reclaim over 5,000sqft of bed space that is now detrimentally shaded by elm. It will also renew UW Landscape Architecture prof. Iain Robertson's original 1987 Winter Garden design intent.
