A. H. Lundberg Associates (Lundberg) is seeking an experienced project engineer to join our growing company. We are the leading worldwide supplier of process systems in several areas within the pulping industry. Further, our Geoenergy division offers air pollution control technologies which are utilized throughout the wood products industries, as well as in many other industries currently subject to EPA MACT regulations.

**Primary Duties will include:**
- Development of Process and Instrumentation Diagrams
- Equipment sizing calculations
- Development of process control strategies
- Specification of valves, instrumentation, piping, etc.
- Obtain quotations from qualified vendors and procure custom fabricated equipment
- Communicate effectively with customers, suppliers and management
- Startup of process systems
- Field troubleshooting to optimize performance

**The successful candidate will possess the following qualifications:**
- BSChE, BSME or Pulp and Paper Science degree with 5+ years relevant project engineering or management experience.
- Experience with kraft pulp mill desirable.
- Black liquor evaporator experience desirable
- Excellent written and verbal communication skills
- Willingness to travel to industrial job sites throughout the world
- Ability to organize and prioritize multiple tasks
- Ability to work in a team environment
