

Paper Science Engineering Undergraduate Students 2004-2005

College of Forest Resources
University of Washington
Seattle, Washington

Meet the Paper Science Engineering Students

The Washington Pulp and Paper Foundation and the faculty of the Paper Science & Engineering program at the University of Washington are proud to present our undergraduate students.

The graduating seniors have successfully demonstrated that they are high achievers and are now ready to be given the chance to prove their value to the industry they have chosen for their careers. Their academic program has included a good deal of direct experience in the pulp and paper and related industries through summer jobs, mentor relationships, and in other ways.

Our past record, with over 400 graduates, has proven that a very high percentage of students stay with the industry after graduation and achieve remarkably high levels of success. In recent years the quality of students entering the program has risen, thanks to diligent recruiting, so the expectations for this group are high indeed!

The talents and skills that will be needed to meet the ongoing challenges to the pulp and paper industry will come in large part from the very people presented here. We urge you to meet our students, talk to them, and decide for yourself. Opportunities to do so can be arranged through our office. Please refer to the back cover of this brochure for contact information.

John E. Hanby
Executive Director

SENIORS

David James Cummings

GRADUATION: June 2005

DEGREES: PSE, ChemE

CONTACT: (360) 337-7749
