

WRAPSTAT

July Update

WrapStat

2020 WFAS Contracts

Our new WFAS license agreements are now available for review. These agreements incorporate our new pricing structure and provide access to WrapStat.

For current users, when your subscription ends you will be asked to continue using the WFAS tool(s) under this new license agreement.

For more information on pricing and accessing the new licensing agreements, please check out our [Become a Collaborator](#) page.

WrapStat Development Update

As you may know, we are in the middle of pilot testing the system. We have six organizations around the country currently testing the youth roster, evaluation cycles and data management features. Our testers have provided insightful feedback and suggestions to improve the system, particularly as it relates to the youth roster tab.

Because of their input we have chosen to invest the time now to make some of these changes and updates so they will be ready in September. To achieve this, we have decided to transition to a phased release of the reports function in WrapStat, which is the final section in development.

Come September 1st, you will be able to add youth to the system, set up evaluation cycles and enter WFAS data. Following the launch, we will phase in the reports features as they become ready for release. Additionally, we will be developing a data upload feature that will allow WrapTrack users to upload their historical data into WrapStat.

Wraparound during COVID-19

WERT continues to provide technical assistance and training for our tools during this time. For more resources about implementing Wraparound during COVID-19, please go to the website of our parent organization, the [National Wraparound Initiative \(NWI\)](#).

Configuration Video

In our June newsletter, we talked about WrapStat configurations. As a continuation of this conversation, we have made a short 6-minute video further elaborating on what we mean when we talk about your "WrapStat Configuration."

[Check out the video here](#)

WERT will work one-on-one with each of our licensees to set up their configuration prior to accessing WrapStat.

WATCH OUR VIDEO

If you haven't yet, please [watch this 20-minute video](#) introducing WrapStat with Dr. Eric Bruns and Marianne Kellogg.

CHECK OUT OUR TOOLS

For those who have not reviewed the full range of Wraparound Fidelity Assessment System (WFAS) tools, [check them out here](#).
