**Toward a global analysis of metabolites in regulatory mutants
of yeast**

Elizabeth M. Humston, Kenneth M. Dombek, Benjamin P. Tu, Elton T. Young, and
Robert E. Synovec

Fig. S1. RNA and metabolite levels for TCA and glyoxylate cycle genes. The metabolite and RNA levels for *snf1Δ* (A), *adr1Δ* (B), *cat8Δ* (C), and *adr1Δcat8Δ* (D) were normalized to those observed in wildtype and incorporated with RNA data, also normalized to wildtype. The RNA levels were derived from previously published work [27].

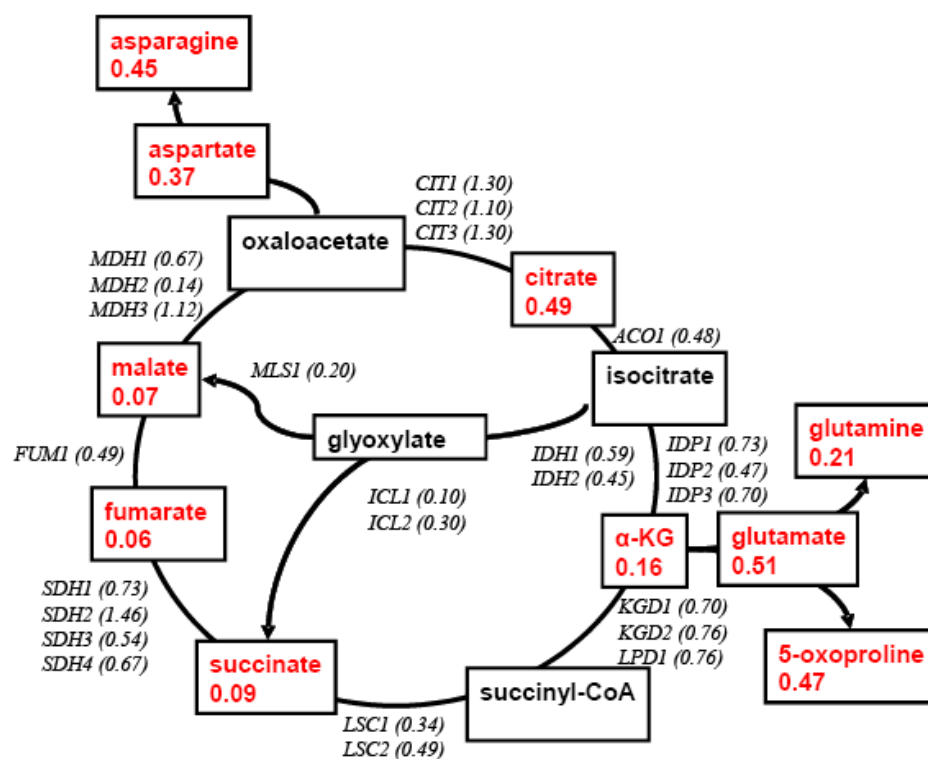

Fig. S2. RNA and metabolite levels for gluconeogenesis. The metabolite and RNA levels for *snf1Δ* (A), *adr1Δ* (B), *cat8Δ* (C), and *adr1Δcat8Δ* (D) were normalized to those observed in wildtype and incorporated with RNA data, also normalized to wildtype. The RNA levels were derived from previously published work [27].
