Promoting public health research, policy, practice, and education is the mission of the American Journal of Public Health. We invite contributions of original unpublished research, opinion and commentary, departments, and letters to the editor. For specific guidelines, please visit the Journal Web site.

Cover: Certified lead-abatement contractors inspect the Providence, RI, home of 2-year-old Kerrin Field, who was lead poisoned during renovation of this house. This month's Health Policy and Ethics Forum considers the ethics of using children for nontherapeutic research in lead abatement studies. While the majority of lead poisoning occurs among poor children of color, all children are potentially at risk.
