Promoting public health research, policy, practice, and education is the mission of the American Journal of Public Health. We invite contributions of original unpublished research, opinion and commentary, departments, and letters to the editor. For specific guidelines, please visit the Journal Web site.

Cover: Tobacco use remains an important determinant of population health worldwide, especially among certain groups defined by age, gender, race/ethnicity, sexuality, social class, and geographic region. This month's Health Policy and Ethics Forum questions whether tobacco policies aimed at preventing youths from smoking are sufficient to protect adults from this public health scourge.
