Grocery Store!  

Names: ___________________  
________________________

Goal: Use the nutrition label on a grocery item to measure out the amount of sugar in a single serving.

Grocery Item: ______________________________________

Amount of sugar in a single serving: _________________g

Calculate the amount of sugar in teaspoons:

\[
\frac{g \times 1 \text{ teaspoon}}{4.2 \text{ g}} = \text{ teaspoons}
\]

Using the measuring spoons measure out the amount of sugar into a cup. Label the cup with the name of the grocery store item and return to the grocery store table.
Grocery Item: ________________________________

Amount of sugar in a single serving: ____________ g

Calculate the amount of sugar in teaspoons:

\[
\text{\[g \times \frac{1 \text{ teaspoon}}{4.2 \text{ g}} = \quad \text{teaspoons}\]}
\]

Using the measuring spoons measure out the amount of sugar into a cup. Label the cup with the name of the grocery store item and return to the grocery store table.
