On Behalf of the Examining Community-Institutional Partnerships for Prevention Research Group
18th National Conference on Chronic Disease Prevention and Control
Thursday, February 19, 2004

Project Description
This 2-year project began in fall 2002 with funding from the Prevention Research Center Program Office through a cooperative agreement between the Association of Schools of Public Health and the Centers for Disease Control and Prevention.

The project aims to identify and synthesize what is known about community-academic collaborations in prevention research and develop and evaluate strategies to foster community and institutional capacity for participatory research at national and local levels. The project's ultimate goal is to facilitate approaches for effectively translating community interventions in public health and prevention into widespread practice at the community level.

Project Partners
- CDC Prevention Research Centers National Community Committee
  Project Representatives: Ella Greene-Moton and Yvonne Lewis, Co-Chairs
- Community-Based Public Health Caucus of the American Public Health Association
  Project Representatives: Renee Bayer and Adele Amodeo
- Community-Campus Partnerships for Health (project coordinator)
  Project Representatives: Sarena Seifer, Jen Kauper-Brown and Annika Robbins
- Community Health Scholars Program
  Project Representatives: Diane Calleson and Renee Bayer
- Detroit Community-Academic Urban Research Center
  Project Representatives: Barbara Israel and Robert McGranaghan
- Harlem Health Promotion Center
  Project Representatives: Richard Mack, Jr.
- New York Urban Research Center
  Project Representatives: Sarah Sisco and Sandro Galea
- Seattle Partners for Healthy Communities
  Project Representatives: Kirsten Senturia, Alison Eisinger, and Gary Tang
- Yale-Griffin Prevention Research Center
  Project Representatives: Kari Hartwig and Margot Zaharek

Project Outcomes and Components
During the first year of the project (2002-2003), the Project Partners collaborated to examine and synthesize existing data they already had available on community partnerships for prevention research. The first year’s activities yielded a report that,

- defines “successful community-institutional collaborations in prevention research”;
- identifies factors that can facilitate and impede these successful relationships and outcomes; and
• presents recommendations and strategies that can build the capacity of communities, institutions and funding agencies to engage in successful community-institutional partnerships for prevention research.

Major Findings

Characteristics of Successful Partnerships

- Trusting relationships
- Equitable processes and procedures
- Diverse membership
- Tangible benefits to all partners
- Balance between partnership process, activities and outcomes
- Significant community involvement in scientifically sound research
- Supportive partner organization policies and reward structures

Barriers to Successful Partnerships

- When characteristics above are absent
- Funding mechanisms, policies and procedures
  - Limited funding sources
  - Funding agency requirements, definitions, timelines and reviews
  - Lack of funding and funding mechanisms that specifically support community as research partner

Recommendations – The complete report from Year 1 outlines:

- Partnership-focused recommendations
  - At the level of the partnership (these are highlighted below)
  - At the collective level across partnerships

- Institution-focused recommendations

- Community-focused recommendations
  - At the level of the community partner
  - At the collective level across partners

- Funding agency-focused recommendations

Recommendations at the level of the partnership

- Pay close attention to membership issues
- Develop structures and processes that help develop trust and sharing of influence and control among partners
- Provide training and technical assistance to partners

- Plan ahead for sustainability
- Pay close attention to the balance of activities within the partnership
- Be strategic about dissemination
- Invest in ongoing assessment, improvement and celebration
Year 2 Strategies

During the second year of the project (2003-2004), the project partners have created two working groups which are designing and implementing two specific strategies for building community and institutional capacity for participatory approaches to prevention research:

- Policy Working Group to implement policy recommendations by developing collaborative relationships with funding agencies work with funding agencies to support partnership infrastructure and assess partnerships in proposals
- Training Working Group to develop and test two curriculum training modules (one for partnerships on developing and sustaining CBPR partnerships, and one for funding agencies and peer-reviewers on reviewing CBPR proposals).

Training Working Group DRAFT Outline for Curriculum Module 1

Unit 1: What is CBPR and why should we do it?
- Definition
- Key principles
- Rationale
- When is CBPR not for you?

Unit 2: Developing a CBPR partnership: Getting started
- Identifying and selecting partners
- Process for getting to know partners and establishing trust
- Addressing expectations/responsibilities/accountability/partnership roles
- Developing mission statement and CBPR principles
- Process for decision-making and communication
- Process for setting priorities
- Establishing organizational structure/infrastructure

Unit 3: Getting the work done
- Process for resource allocation
- Understanding partnership lifecycles
- Revisiting expectations/responsibilities/accountability/partnership roles
- Addressing fiscal concerns and management of staffing
- Addressing issues of ownership and dissemination

Unit 4: How to sustain a CBPR partnership
- Process for establishing ongoing evaluation
- Weathering the change process
  - Conflict resolution
- Appreciation and celebration
- Timeline: How to negotiate short-term vs. long-term work

Discussion questions

For Renee and Yvonne, only

1. What does the group think about what we presented? Does it make sense? Any general questions about the project
2. How valuable do they see these training modules to be? Would they attend?
3. Are there partnership issues they’re having that don’t seem to be covered in the training outline?
4. Are they familiar with any materials, readings, case studies, exercises, videos, that might be useful for this curriculum that we can review?
