Postdoctoral Position(s) in Physical Oceanography, Lamont-Doherty Earth Observatory of Columbia University

The Division of Ocean and Climate Physics at the Lamont-Doherty Earth Observatory of Columbia University is seeking two post-doctoral researchers with interest in observational physical oceanography to work on an NSF-funded project on “Flow, Turbulence and Mixing in Mid-Ocean Ridge Fracture Zone Canyons.” The successful applicants are expected to participate in the data acquisition during two research cruises to the South Atlantic, and to take the lead, under the guidance of project-PI Thurnherr, in the analysis, interpretation and dissemination of the project data.

Candidates must have a Ph.D. in physical oceanography or in a related field and an interest in working with observational data. Prior experience with collection and analysis of observational data are a distinct plus. Candidates should have good oral and written communication skills. A track record in publishing journal papers and conference presentations is preferred.

The positions are available immediately. Terms of appointment are for one (1) year, renewable for up to three years, subject to approval and availability of funding.

Search will remain open for at least 30 days after the ad appears and will continue until the positions are filled. Please visit our online application site at https://academicjobs.columbia.edu/applicants/Central?quickFind=59110 to submit your curriculum vitae, a statement of research interests, and names and addresses of 3 referees.

Columbia University benefits afforded with this Officer of Research position.

Columbia University is an Equal Opportunity/Affirmative Action employer.
